Drones and the Future of Air Warfare

Michael P. Kreuzer 2016-05-26 This book examines the evolution of airpower and specifically the growth and proliferation of Remotely Piloted Aircraft (RPAs). While most existing literature examines either the law or ethics of RPAs, and some newer scholarship looks to the battlefield effectiveness (the gains from strikes versus the potential for 'blowback, etc.), this work investigates it from a broader military perspective. It examines the strategy for employment of RPAs across the spectrum of warfare, the potential deterrent value of RPAs in some circumstances, and the resulting ability of RPAs to fundamentally shift the character of

when and how wars are fought. The central aim of this book is to evaluate the role of 'drones' in warfare to date, and make basic projections on how states will adopt RPAs and UCAVs in the future. At the core is the goal of answering a broad, underlying research question: How will the RPA innovation impact military strategy and international security? This book will be of much interest to students of airpower, drone warfare, military and strategic studies, security studies and IR.

Proceedings of the 12th Reinventing

Space Conference Scott Hatton
2016-12-25 The proceedings of the
2014 Reinventing Space conference
present a number of questions in the
context of a constantly innovating
space industry, from addressing the
future of global cooperation,
investigating the impact of cuts in
US government spending on the private
space sector, and probing the overall
future of the commercial launch
sector. Space tourism and new
technology promise the revival of
interest in space development (the
Apollo Era was the first period of
intense space activity and growth).
The need to create dramatically lower
cost, responsive and reliable launch
systems and spacecraft has never been
more vital. Advances in technology
are allowing smaller and cheaper
satellites to be orbited - from

cubesats to nanosatellites to femosatellites. Thanks to more efficient new launch possibilities, low cost access to space is becoming ever more achievable. Commercial companies and countries are targeting the industry with new funding.

Organised by the British Interplanetary Society, the presentations at this conference thoroughly address these challenges and opportunities.

Handbook of Indian Defence Policy
Harsh V. Pant 2015-10-06 India has
the world's fourth largest military
and one of the biggest defence
budgets. It asserts its political and
military profile in South Asia and
the Indian Ocean region. The nation
has been in the midst of an ambitious
plan to modernize its largely Soviet-
era arms since the late 1990s and has
spent billions of dollars on latest
high-tech military technology. This
handbook: canvasses over 60 years of
Indian defence policy and the major
debates that have shaped it;
discusses several key themes such as
the origins of the modern armed
forces in India; military doctrine
and policy; internal and external

challenges; and nuclearization and its consequences; includes contributions by well-known scholars, experts in the field and policymakers; and provides an annotated bibliography for further research. Presented in an accessible format, this lucidly written handbook will be an indispensable resource for scholars and researchers of security and defence studies, international relations and political science, as well as for government think tanks and policymakers.

Private Military and Security Companies and States Christopher Spearin 2017-08-02 This book identifies and explains the functional and ideational boundaries regarding what states and Private Military and Security Companies (PMSCs) both do and possess regarding

land power, sea power, and air power. Whereas the mercenaries, privateers, and chartered companies of years past held similar characteristics to state military forces, the PMSCs of today are dissimilar for two reasons: a conventional forces norm amongst states and a state proclivity towards the offensive. These factors reveal both the limitations of and the possibilities for contemporary security privatization. This volume is ideal for civilian and military practitioners and students wishing to develop a detailed understanding of what the private military and security industry has to offer and why it is structured the way it is.

Cyber Security: Analytics, Technology and Automation Martti Lehto 2015-05-30 The book, in addition to the cyber threats and technology,

processes cyber security from many sides as a social phenomenon and how the implementation of the cyber security strategy is carried out. The book gives a profound idea of the most spoken phenomenon of this time. The book is suitable for a wide-ranging audience from graduate to professionals/practitioners and researchers. Relevant disciplines for the book are Telecommunications / Network security, Applied mathematics / Data analysis, Mobile systems / Security, Engineering / Security of critical infrastructure and Military science / Security.

Censored 2014 Mickey Huff 2013-10-08 Truthout's Progressive Pick of the Week Ralph Nader's 10 Books to Provoke Conversation in 2014 Every year since 1976, Project Censored, our nation's oldest news-monitoring

group--a university-wide project at Sonoma State University founded by Carl Jensen, directed for many years by Peter Phillips, and now under the leadership of Mickey Huff--has produced a Top-25 list of underreported news stories and a book, Censored, dedicated to the stories that ought to be top features on the nightly news, but that are missing because of media bias and self-censorship. Seven Stories Press has been publishing this yearbook since 1994, featuring the top stories listed democratically in order of importance according to an international panel of judges. Beyond the Top-25 stories, additional chapters delve further into timely media topics: The Censored News and Media Analysis section provides annual updates on Junk Food News and

News Abuse, Censored Deja Vu, signs of hope in the alternative and news media, and the state of media bias and alternative coverage around the world. In the Truth Emergency section, scholars and journalists take a critical look at the US/NATO military-industrial-media empire. And in the Project Censored International section, the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world. A perennial favorite of booksellers, teachers, and readers everywhere, Censored is one of the strongest lifesigns of our current collective desire to get the news we citizens need--despite what Big Media tells us.

The Rhodesian Air Force in Zimbabwe

War of Liberation, 1966-1980

Contributing to the debate about the role of airpower in guerrilla warfare, this book evaluates the development of the Rhodesian Air Force during the Second Chimurenga or Bush War (1966-1979). Airpower in irregular conflict is primarily effective at the tactical level because guerrilla warfare is not a purely military conflict. The Rhodesian Air Force was deployed in a war-winning versus a supporting role as a result of the shortage of manpower to deal with insurgency, and almost all units of the Rhodesian Security Forces depended on its tactical effectiveness. Technical challenges faced by the Air Force,

combined with the rate of guerrilla infiltration and the misuse of airpower to bomb guerrilla bases in neighboring countries--some of them filled with untrained civilians--largely negated the success of airpower.

Geography, Power, Strategy and Defence Policy Desmond Ball

2016-05-18 Paul Dibb AM has had an extraordinary career. He enjoys an international scholarly reputation of the highest order, while at the same time he has done much distinguished public service. He was a pioneer in moving back and forth between posts in government departments, notably the Department of Defence, and

academia. He began as a student of Soviet economic geography, and then spent nearly two decades in Australian Defence intelligence, including service as Head of the National Assessments Staff (NAS) in the Joint Intelligence Organisation (JIO) from 1974 to 1978, Deputy Director of JIO in 1978–80, Director of JIO in 1986–88, and Deputy Secretary of Defence (Strategy and Intelligence) in 1988–91, before becoming a Professor in the Strategic and Defence Studies Centre (SDSC) at The Australian National University (where he is now an Emeritus Professor). He has been quite happy to engage in vigorous public debate about important and controversial strategic and defence issues, giving him a high public profile. The contributors include two former

Chancellors of ANU, one a former Minister of Defence, and the other a former Secretary of the Department of Defence, a former Chief of the Defence Force (CDF), and other former senior officials, as well as academic specialists in geography, international relations, and strategic and defence studies. 'This would be a high-quality set of essays for any edited volume, but for a festschrift – a genre that sometimes generates uneven collections – this is an exceptional assembly. The individual pieces are very good; together, they have coherence and power.' – Professor Ian Hall, Professor of International Relations, Griffith University

a triad of nuclear-certified long-range bombers, intercontinental ballistic missiles, and submarine-launched ballistic missiles. Since the early 1970s, U.S. nuclear forces have been subject to strategic arms control agreements. The large numbers and diversified nature of the U.S. nonstrategic (tactical) nuclear forces, which cannot be ignored as part of the overall nuclear deterrent, have decreased substantially since the Cold War. While there is domestic consensus today on the need to maintain an effective deterrent, there is no consensus on precisely what that requires, especially in a changing geopolitical environment and with continued reductions in nuclear arms. This places a premium on having the best possible analytic tools,

methods, and approaches for understanding how nuclear deterrence and assurance work, how they might fail, and how failure can be averted by U.S. nuclear forces. U.S. Air Force Strategic Deterrence Analytic Capabilities identifies the broad analytic issues and factors that must be considered in seeking nuclear deterrence of adversaries and assurance of allies in the 21st century. This report describes and assesses tools, methods - including behavioral science-based methods - and approaches for improving the understanding of how nuclear deterrence and assurance work or may fail in the 21st century and the extent to which such failures might be averted or mitigated by the proper choice of nuclear systems, technological capabilities, postures,

and concepts of operation of American nuclear forces. The report recommends criteria and a framework for validating the tools, methods, and approaches and for identifying those most promising for Air Force usage.

Strategic Failure Mark Moyar 2015-06-23 In this timely and fascinating account of US military power in the era of Barack Obama, a renowned historian with more than a decade inside the US Department of Defense reveals the true nature of the president's political legacy as his two terms in office draw to a close. In stunning detail, Mark Moyar illustrates how the mounting global catastrophes of Obama's second term are the direct result of the president's first-term decisions to shrink US defense and replace large overseas military commitments with "light footprints." The rise of ISIS. The Benghazi attack and murder of a US ambassador. The growing threats of Russia, China, and Iran—Moyar reveals how these and other tragic

occurrences are the consequences of Obama's: -Withdrawal of US military in Iraq -Rapid drawdown in Afghanistan -Hands-off policy with Syria -Cuts to defense spending - Reliance on drone strikes in Pakistan, Yemen, and Somalia -Failure to deliver on his substitutes for military power -Political self-interest -International image as a weak and passive leader Most disturbing, according to Moyer's penetrating analysis, is the clear message that Obama's military drawdown places all Americans at risk, with conditions primed for future cataclysms at home and abroad. Drawing upon the lessons of Obama's strategic failures, Moyer identifies methods for recovering and strengthening US national security in the years—and the administrations—to

The Other Air Force Matt Sienkiewicz
2016-10-01 As it seeks to win the
hearts and minds of citizens in the
Muslim world, the United States has
poured millions of dollars into local
television and radio programming,

hoping to generate pro-American
currents on Middle Eastern airwaves.
However, as this fascinating new book
shows, the Middle Eastern media
producers who rely on these funds are
hardly puppets on an American string,
but instead contribute their own
political and creative agendas while
working within U.S. restrictions. The
Other Air Force gives readers a
unique inside look at television and
radio production in Afghanistan and
the Palestinian territories, from the
isolated villages of the Afghan
Panjshir Valley to the congested
streets of Ramallah. Communications
scholar Matt Sienkiewicz explores how
the U.S. takes a "soft-psy" approach
to its media efforts combining "soft"
methods of encouraging entertainment
programming, such as adaptations of
The Voice and The Apprentice with

more militaristic “psy-ops” approaches to information control. Drawing from years of field research and interviews with everyone from millionaire executives to underpaid but ever resourceful cameramen, Sienkiewicz considers the perspectives of the Afghan and Palestinian media workers trying to forge viable broadcasting businesses without straying outside American-set boundaries for acceptable content. As it carefully examines the interplay of U.S. military and economic might with the capacity for local ingenuity and resistance, the book also analyzes the intriguingly complex programming that emerges from this tension. Combining eyewitness reportage with cutting-edge scholarship, *The Other Air Force* reveals the remarkable creative

output that can emerge even from the world’s tensest conflict zones.
