Beholding Violence in Medieval and Early Modern Europe Allie Terry-Fritsch

2017-07-05 Interested in the ways in which medieval and early modern communities have acted as participants, observers, and interpreters of events and how they

ascribed meaning to them, the essays in this interdisciplinary collection explore the concept of beholding and the experiences of individual and collective beholders of violence during the period. Addressing a range of medieval and early modern art forms, including visual images, material objects, literary texts, and performances, the contributors examine the complexities of viewing and the production of knowledge within cultural, political, and theological contexts. In considering new methods to examine the process of beholding violence and the beholder's perspective, this volume addresses such questions as: How does the process of beholding function in different aesthetic conditions? Can we speak of such a thing as the 'period eye' or an acculturated gaze

of the viewer? If so, does this particularize the gaze, or does it risk universalizing perception? How do violence and pleasure intersect within the visual and literary arts? How can an understanding of violence in cultural representation serve as means of knowing the past and as means of understanding and potentially altering the present?

The Wildlife Techniques Manual Nova J. Silvy 2012-03 A standard text in a variety of courses, the Techniques Manual, as it is commonly called, covers every aspect of modern wildlife management and provides practical information for applying the hundreds of methods described in its pages. To effectively incorporate the explosion of new information in the wildlife profession, this latest edition is logically organized into a

two-volume set: Volume 1 is devoted to research techniques and Volume 2 focuses on management methodologies. **The Motorbike Book** DK 2012-04-02 Set your pulse racing with this stunning visual guide to over 1000 pin-up machines - iconic symbols of wanderlust, speed, and the open road. From Gottlieb Daimler's gas-powered "engine on a bicycle" which set fire to the seat on its first outing, to superbikes such as the Ducati 916, The Motorbike Book takes you on an enthralling tour of the bike's history. It shows you bikes that appeal to the head - practical forms of transport - and to the heart - a parade of classic pin-ups including cult machines such as the Honda RC30, the Triumph Bonneville and the Harley-Davidson XR750. The Motorbike Book shows the brilliance and

impracticality of different designs and features detailed cross-sections of engines such as the air-cooled two-stroke. It explains how the great marques such as the Royal Enfield, the "legendary" Indian Scout, Vespa, and Norton all became household names. Whether you are a hardcore enthusiast, or looking forward to your first machine, this is one title you cannot be without.

The Sidecar Guide Rod Young
2019-04-11 The Sidecar Guide contains everything for the sidecar rider, new or experienced, with sections on riding skills, sidecar setup, issues and solutions for handling problems, sidecar selection, accessories, care and maintenance, and much more. The

first new sidecar book of it's type to be published in many years, it draws on my many years of experience operating 3WB Sidecars as well as the invaluable contributions made by specialists in the fields of disabled sidecar use and taking your dog in the sidecar. The "go to" reference for people new to sidecars and exisiting sidecar owners. Both books are written for left and right handed sidecars.

Intermittent Rivers and Ephemeral Streams Thibault Datry 2017-07-11
Intermittent Rivers and Ephemeral Streams: Ecology and Management takes an internationally broad approach, seeking to compare and contrast findings across multiple continents, climates, flow regimes, and land uses to provide a complete and integrated perspective on the ecology of these ecosystems. Coupled with this, users will find a discussion of management approaches applicable in different regions that are illustrated with relevant case studies. In a readable and technically accurate style, the

book utilizes logically framed chapters authored by experts in the field, allowing managers and policymakers to readily grasp ecological concepts and their application to specific situations. Provides up-to-date reviews of research findings and management strategies using international examples Explores themes and parallels across diverse sub-disciplines in ecology and water resource management utilizing a multidisciplinary and integrative approach Reveals the relevance of this scientific understanding to managers and policymakers

Delisting Endangered Species Mark McClure 2005
School-based Research Elaine Wilson 2017-04-10 Focused on the needs of the new classroom researcher, and those studying education on Masters-level courses, this is a thorough and thoughtful guide to the research process, covering qualitative, quantitative and mixed research methods. It guides you through research design, data collection and analysis and how to write up your research findings. This third edition has been updated to provide further coverage on the best ways to approach, construct and carry out educational research within the classroom including: a new chapter on disseminating research knowledge expanded coverage of formulating research questions a reworked chapter

structure better reflecting the research process This is essential reading for students on education degree programmes including a research methods component, including education studies, undergraduate (BEd, BA with QTS) and postgraduate (PGCE, School Direct, Teach First, SCITT) initial teacher education courses, MEd and professional development courses. Risk analysis in aquaculture Lind, C.E. 2015-04-07 This publication is based on materials covered and outputs generated during the Workshop on Risk Assessment Methodologies and Tools for Aquaculture in Sub-Saharan Africa, which was jointly held by WorldFish and FAO in Siavonga, Zambia on 28 June - 2 July 2010. The workshop was delivered as a training exercise to 17 participants from seven sub-Saharan countries and was designed to highlight current methodologies and tools available for environmental risk analysis in aquaculture development. A key focus of the workshop was to encourage participants to consider hypothetical but realistic scenarios and to discuss issues relevant to evaluating the environmental risks of a given

activity or scenario. This publication presents selected scenarios from the workshop and the outcomes of the deliberative process as developed by the participants. This publication is factual but not comprehensive, therefore any statements or estimations of risk do not represent the actual risks arising from the described scenario. It is intended to serve as an easily readable introduction to risk analysis, highlighting worked examples that will provide guidance on how a risk analysis may be approached in a similar situation. *Current Catalog* National Library of Medicine (U.S.) 1969 Includes subject section, name section, and 1968-1970, technical reports.

Ecological Modeling in Risk Assessment Robert A. Pastorok

2016-04-19 Toxic chemicals can exert effects on all levels of the biological hierarchy, from cells to organs to organisms to populations to

entire ecosystems. However, most risk assessment models express their results in terms of effects on individual organisms, without corresponding information on how populations, groups of species, or whole ecosystems may respond to chemical stressors. *Ecological Modeling in Risk Assessment: Chemical Effects on Populations, Ecosystems, and Landscapes* takes a new approach by compiling and evaluating models that can be used in assessing risk at the population, ecosystem, and landscape levels. The authors give an overview of the current process of ecological risk assessment for toxic chemicals and of how modeling of populations, ecosystems, and landscapes could improve the status quo. They present a classification of ecological models and explain the

differences between population, ecosystem, landscape, and toxicity-extrapolation models. The authors describe the model evaluation process and define evaluation criteria. Finally, the results of the model evaluations are presented in a concise format with recommendations on modeling approaches to use now and develop further. The authors present and evaluate various models on the basis of their realism and complexity, prediction of relevant assessment endpoints, treatment of uncertainty, regulatory acceptance, resource efficiency, and other criteria. They provide models that will improve the ecological relevance of risk assessments and make data collection more cost-effective. *Ecological Modeling in Risk Assessment* serves as a reference for

selecting and applying the best models when performing a risk assessment.
