**De intelligente belegger** Benjamin Graham 2015-03-25 Volgens Warren Buffet verreweg het beste boek over beleggen dat ooit is geschreven. De klassieker 'De intelligente belegger' uit 1949 wordt zelfs na ruim 70 jaar nog steeds geprezen als de bijbel die iedere belegger gelezen moet hebben. De filosofie van Benjamin Graham heeft zich door de jaren heen keer op keer bewezen - hij behoedt beleggers voor kostbare fouten en leert ze een succesvolle langetermijnstrategie te ontwikkelen. Omdat Graham niet vertelt welke aandelen je zou moeten kopen, maar juist een effectieve manier van denken en handelen aanleert, is het boek nog steeds verbazingwekkend actueel. 'De intelligente belegger' is in de loop der jaren in talloze talen vertaald en sinds verschijnen zijn er wereldwijd meer dan 1 miljoen exemplaren verkocht. Niet voor niets door Warren Buffet uitgeroepen tot verreweg het beste boek over beleggen dat ooit is geschreven. Met een uitgebreide inleiding van superbelegger John C. ### **South African Human Resource**

**Management** Barney Erasmus 2008 Book & CD. This fourth edition makes it clear that all who are interested in the sustainability of South Africa -- and Africa -- must put human resource management (HRM) at the very core of the management of organisations generally. The content is aligned to outcomes that are geared towards analytical and critical thinking about the theory and practice of HRM in South Africa. The African context is addressed, and ample information about HRM aspects 'elsewhere in Africa' is provided. This edition breaks away even further from the traditional structure of so many standard HRM textbooks. It challenges a broadening of the 'agenda' and scope of HRM work: HRM is not only about managing employees, but also about managing the work and the people who do the work of and in organisations. This may involve alternative ways of getting the work of organisations done superiorly. This book will help you to apply HRM effectively to achieve its ultimate aim, namely to add value to people, to organisations and to society. This comprehensive book is organised around themes such as: Developing an appreciation for the context of HRM in South Africa; Strategising, designing and planning as

preparatory HRM work; Sourcing work talent; Facing the countrys people empowerment challenge; Meeting the reward and care challenge; Handling labour and employee relations challenges; Championing change and transformation; Managing HRM-related information, including HRM and sustainability reporting. Based on most recent theoretical developments, the emphasis is on the practical applications. Samples of relevant documents are included, and an accompanying CD contains a wealth of relevant resources as well as a continuing, integrating case study that serves as a basis for these applications, and individual and group activities. As a package, South African Human Resource Management will be extremely valuable to both current and aspirant managers, and human resource practitioners.

**Mega-projects** Alan A. Altshuler 2003 Since the demise of urban renewal in the early 1970s, the politics of large-scale public investment in urban areas has received little scholarly attention. In *Mega-Projects*, Alan A. Altshuler and David E. Luberoff examine the forces that gave rise to a great wave of urban mega-projects in the 1950s and 1960s, that broke this wave in the years around 1970, and that have shaped a new generation of such projects in the decades since. While focusing principally on transportation mega-projects such as Boston's Central Artery/Tunnel project (the Big Dig), Denver International Airport, and the Los Angeles subway, they consider as well the scores of new stadiums, arenas, and convention centers built (mainly at public expense) in recent years. *Mega-Projects* includes rich narratives of both national policymaking and local mobilization to bring about highway, airport, rail-transit, and downtown revitalization projects, particularly since the 1970s. The specific projects chronicled are drawn from numerous regions including Boston, Denver, Los Angeles, New York City, Chicago, Atlanta, Dallas, Portland, and Seattle. It also includes broad analyses, seeking to place the authors' findings in relation to leading theories of urban and American politics, and to appraise the most important practical consequences of policy shifts in this arena over the past half-century. In a concluding chapter, the authors examine post-September 11 developments and the potential effects of both new fiscal pressures and security concerns on the future of urban mega-projects. Alan A. Altshuler is the Frank and Ruth Stanton Professor of Urban Policy at Harvard University's Kennedy School of Government and its Graduate School of Design. He is also director of the Kennedy School's A. Alfred Taubman Center for State and Local

Government. David E. Luberoff is associate director of the A. Alfred Taubman Center for State and Local Government and an adjunct lecturer at the Kennedy School of Government.
