

Die Unternehmung Swiss Journal Of Business Research And Practice

Recognizing the pretentiousness ways to get this book **Die Unternehmung Swiss Journal Of Business Research And Practice** is additionally useful. You have remained in right site to start getting this info. acquire the Die Unternehmung Swiss Journal Of Business Research And Practice belong to that we manage to pay for here and check out the link.

You could buy lead Die Unternehmung Swiss Journal Of Business Research And Practice or acquire it as soon as feasible. You could speedily download this Die Unternehmung Swiss Journal Of Business Research And Practice after getting deal. So, next you require the book swiftly, you can straight get it. Its as a result entirely simple and as a result fats, isnt it? You have to favor to in this expose

New Waves in Innovation Management

*Research (ISPIM Insights) Marcus
Tynnhammar 2019-02-02 Launched in*

Downloaded from talerka.tv on October
3, 2022 by guest

2011 to recognize the prolific contribution that PhD dissertations make to the field of Innovation Management, the ISPIIM Dissertation Award selects three winners from the possible 100+ entries every year. Aided in the selection process by the generous support of Innovation Leaders, the ISPIIM presents the awards at their annual Innovation Conference. With only three finalists being selected each year, many excellent submissions do not receive the recognition they deserve. To rectify this, the 2018 ISPIIM Dissertation Award cast its spotlight beyond the top three dissertations and onto a much greater number of entries. Compiling the top 28 submissions received this year, 'New Waves in Innovation Management Research' is organized into six

thematic sections that cover areas such as investments, collaboration, and creativity. Presenting a broad range of case studies and data from across global, this edited volume illustrates the breadth of research potential in the coming wave of innovation management. This book will be of interest to students, researchers and professional managers, alike, who are interested in or actively involved in the latest research on innovation management. *Multidisciplinary Design of Sharing Services* Maurizio Bruglieri 2018-04-17 This book explores all aspects of the sharing economy, pursuing a multidisciplinary approach encompassing Service Design, Spatial Design, Sociology, Economics, Law, and Transport and Operations Research. The book develops a unified

vision of sharing services, and pinpoints the most important new challenges. The first, more theoretical part covers general topics from the perspectives of experts in the respective disciplines. Among the subjects addressed are the role of the user in co-design and co-production; impacts of sharing services on cities, communities, and private spaces; individual rewarding and social outcomes; regulatory issues; and the scope for improving the efficiency of design, management, and analysis of sharing services. In turn, the second part of the book presents a selection of case studies of specific sharing services, in which many of the concepts described in the first part are put into practice. Readers will gain a deeper understanding of the

dynamics of sharing services and of the hidden problems that may arise. Key factors responsible for the success (or failure) of sharing services are identified by analyzing some of the best (and worst) practices. Given its breadth of coverage, the book offers a valuable guide for researchers and for all stakeholders in the sharing economy, including startup founders and local administrators.

Human Resource Management in Consulting Firms Michel E. Domsch
2006-04-22 This book presents insider reports from high-profile international consultancies which allow practitioners, scholars and graduates to gain a rare, unvarnished insight into people management in business consulting. In addition to a comprehensive overview of existing H-

R systems, the book provides details of practices dealing with issues such as value-oriented corporate culture, gender diversity management, employability, leadership development, knowledge management and employer branding.

Disruptive Technology: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources 2019-07-05 The proliferation of entrepreneurship, technological and business innovations, emerging social trends and lifestyles, employment patterns, and other developments in the global context involve creative destruction that transcends geographic and political boundaries and economic sectors and industries. This creates a need for an interdisciplinary exploration of disruptive

technologies, their impacts, and their implications for various stakeholders widely ranging from government agencies to major corporations to consumer groups and individuals. **Disruptive Technology: Concepts, Methodologies, Tools, and Applications** is a vital reference source that examines innovation, imitation, and creative destruction as critical factors and agents of socio-economic growth and progress in the context of emerging challenges and opportunities for business development and strategic advantage. Highlighting a range of topics such as IT innovation, business strategy, and sustainability, this multi-volume book is ideally designed for entrepreneurs, business executives, business professionals, academicians, and researchers interested in

strategic decision making using innovations and competitiveness.

Entwicklung eines komponentenbasierten Vorgehensmodells zum Geschäftsmodell-Management am

Beispiel der E-Carsharing-Branche

Sebastian Mezger 2018-02-08 Obwohl ein Großteil der Unternehmen bei technisch getriebenen Produktinnovationen über exzellente Abläufe verfügt, ist diese Fähigkeit bei der Innovation und dem strategiebasierten Management von Geschäftsmodellen bislang kaum entwickelt worden. Der Erfolg unternehmerischer Tätigkeit kann jedoch in hohem Maße mit der Durchführung eines auf Führungsebene verorteten Managements von Geschäftsmodellen verbunden werden. Dabei fungiert die strategische Planung als integraler Bestandteil

und essentieller Handlungsrahmen des Geschäftsmodell-Managements. Primäres Ziel der Arbeit ist die Entwicklung eines Prozesses zum Geschäftsmodell-Management, wobei auch die praktische Anwendbarkeit im Fokus steht. Hierfür erfolgt eine umfassende konzeptionelle Darstellung eines entsprechenden Vorgehensmodells zum Geschäftsmodell-Management. Als Basis einer derartigen anwendungsorientierten Ausgestaltung dienen wissenschaftliche theoretische Grundlagen zum Geschäftsmodell-Management.

Technology and Corporate Law Godwin, Andrew 2021-08-27 In light of the overwhelming impact of technology on modern life, this thought-provoking book critically analyses the interaction of innovation, technology and corporate law. It highlights the

impact of artificial intelligence and distributed ledgers on corporate governance and form, examining the extent to which technology may enhance or displace conventional theories and practices concerning corporate governance and regulation. Expert contributors from multiple jurisdictions identify themes and challenges that transcend national boundaries and confront the international community as a whole.

Financial Intelligence in Human Resources Management Gurinder Singh
2021-07-15 This new volume familiarizes readers with the very relevant concepts of human resources and finance in Industry 4.0. The book looks at the adoption of current fast-moving computers and automation in the workplace and its impact on the financial aspects of human

resources and how HR can be enhanced with smart and autonomous systems fueled by data and machine learning. The chapters offer case studies that provide firsthand knowledge of real-life problems, solutions, and situations faced by the industry. The volume highlights the thought process in resolution of the complex problems. Topics include HR management approaches, global HR challenges, behavioral finance for financial acumen, corporate social responsibility, women empowerment in the HR industry, emotional intelligence in the era of Industry 4.0, and more.

**Geschäftsmodelle der Datenindustrie:
Herleitung eines
Klassifizierungsansatzes mit
Fallbeispielen aus der Telematik**
Daniel Hasler 2015-01 Ein

Geschäftsmodell ist die Verknüpfung einzelner Elemente zu der ganzheitlichen Logik einer nutzenstiftenden Wertschöpfung, die ein Unternehmen für sich selbst, gegenüber seinen Kunden, Partnern und anderen Interessengruppen erbringt. Ein nachhaltiges Geschäftsmodell kann die Quelle eines strategischen Wettbewerbsvorteils sein. Eine Klassifizierung der Modelle zeigt Möglichkeiten auf, wie ein Unternehmen in der Industrie agieren kann. Der vorliegende Ansatz umfasst neun Komponenten der Daten-Geschäftsmodelle: Datensammlung, Datendigitalisierung, Datenanalyse, Datenarchivierung, Datenteilung, Datenkombination, Datenverkauf, Datenzugriff und Daten-Consulting. Hinzu kommen die 'Enabler' Datensicherheit und Datenübertragung.

Das Modell fokussiert sich zum einen auf den Datenfluss von der Kreation bis zur Verarbeitung, zum anderen auf Schlüsselkomponenten, wie Ressourcen, Aktivitäten, Kanäle oder Kundenbeziehung. Es dient zur Weiterentwicklung, Innovation, Analyse und für Vergleiche. Ein Innovationsansatz für Geschäftsmodelle umfasst eine Analyse des Status Quo auf Basis einer Klassifizierungsmatrix, einer Umweltanalyse und dem Einsatz von Stufenmodellen. Auf dieser Basis ist es möglich Ideen zu generieren und diese in Experimenten zu testen, zu Prototypen weiterzuentwickeln und in Szenarien zu simulieren. Die Testung des Modells findet mit Hilfe von vier Fallstudien aus der Fahrzeugtelematik statt: PAYD-/PHYD-Versicherungen, Remote Diagnose, Car Sharing und

Flottenmanagement.

Nonprofit Management Bernd Helmig
2013-02-25 Gewinner des VHB-
Lehrbuchpreises 2013! Die Bedeutung
von Nonprofit-Organisationen wird
angesichts der immer schwieriger
werdenden staatlichen Finanzierung
vieler Aktivitäten stetig steigen.
Einhergehend mit dieser Entwicklung
und den großen Spendenvolumina, die
teilweise damit verbunden sind, nimmt
auch der Bedarf an der
Professionalisierung des Nonprofit-
Sektors zu. Dies sollte jedoch nicht
durch eine unreflektierte Anwendung
von betriebswirtschaftlichen
Instrumenten erfolgen.
Dementsprechend zeigt dieses Buch die
Besonderheiten des Management von
Nonprofit-Organisationen systematisch
auf. Nur so kann dem Wunsch von
Spendern und sonstigen

Anspruchsgruppen von Nonprofit-
Organisationen nach effizienter und
effektiver Mittelverwendung sowie
nach Transparenz, Rechenschaftslegung
und Verantwortlichkeit Rechnung
getragen werden. Dieses Lehrbuch
führt Studierende, Wissenschaftler
und Führungskräfte aus der Praxis in
die Grundlagen des Nonprofit
Management ein. Dabei werden alle
zentralen Bereiche des so genannten
Dritten Sektors vorgestellt.
Zahlreiche Beispiele und Fallstudien
aus verschiedenen Nonprofit-Branchen
veranschaulichen die Konzepte und
ermöglichen ein schnelles Umsetzen in
die Praxis. Ergänzend zum Buch wurde
unter www.nonprofit-management.biz
eine umfassende Lernplattform mit
Videos, Selbsttests, Fallstudien und
Beispielen eingerichtet. Preise: Am
24. Juni 2013 erhielten die Autoren

Bernd Helmig und Silke Boenigk für Ihr Lehrbuch "Nonprofit Management" den Lehrbuchpreis des Verbandes der Hochschullehrer für Betriebswirtschaft e.V. (VHB). In der Laudation von Prof. Dr. Dorothea Greiling heißt es dazu: Das vom VHB in diesem Jahr ausgezeichnete Lehrbuch schließt hier nicht nur eine inhaltliche Lücke, sondern zeichnet sich auch durch die didaktische Aufmachung als hervorragend geeignet für den Einsatz in der akademischen Lehre aus: Umfangreiche E-Learning-Angebote, das Wechselspiel zwischen Theorieblöcken und Minicases und der klare Duktus in der Leserführung sind vorbildhaft nicht nur, was die Ausbildung in Methoden und Konzepten des Nonprofit-Managements angeht, sondern auch betreffend die praktische Umsetzung. Pressestimmen:

"Das Lehrbuch vermittelt eine zeitgemäße Einführung in den Themenbereich des Nonprofit Management und ist auf dem besten Weg, sich als Standardwerk zu etablieren. Es kann daher als Einführungswerk sowohl für Studierende und Wissenschaftler als auch für Führungskräfte aus der Nonprofit-Praxis mit Interesse an dieser Thematik bestens empfohlen werden." Manfred Bruhn, in: Zeitschrift für öffentliche und gemeinwirtschaftliche Unternehmen 04/2012 "Kurzum: Wer einsteigen will, rindet in diesem Buch einen sehr guten Wegweiser, wer weiterarbeiten möchte, profitiert von der Literaturlauswertung und der klaren Struktur." in: Verbändereport 05/2012, zur 1. Auflage 2012 "Alle Themen werden kurz und klar

dargestellt. Besonders gefällt die häufige und zu den jeweiligen Themen gut passende Einbeziehung von Beispielen. Damit gewinnt diese Publikation für Praktiker, Studenten und Wissenschaftler als Einstiegs- und Nachschlagewerk in Lehre und Praxis eine besondere Bedeutung." Swen Neumann, in: Die Stiftung 04/2012 "Wegen der zunehmenden Bedeutung der NPOs war es an der Zeit, die Unterschiede, aber auch die Gemeinsamkeiten von Profit- und Nonprofit-Organisationen systematisch in einem Lehrbuch aufzubereiten. Den beiden Autoren ist dies nicht nur inhaltlich, sondern auch in didaktischer Hinsicht hervorragend gelungen." in: WISU 07/12 Über die Autoren: Prof. Dr. Bernd Helmig lehrt Public und Nonprofit Management an der Universität Mannheim. Prof. Dr.

Silke Boenigk lehrt Betriebswirtschaft, insbesondere Management von Öffentlichen, Privaten & Nonprofit-Organisationen, an der Universität Hamburg *Knowledge Management Initiatives and Strategies in Small and Medium Enterprises* Bencsik, Andrea 2016-09-27 To maintain a competitive edge against other businesses, companies must ensure the most effective strategies and procedures are in place. This is particularly critical in smaller business environments with fewer resources. *Knowledge Management Initiatives and Strategies in Small and Medium Enterprises* is an authoritative reference source for the latest scholarly material on the management of knowledge resources in smaller-scale enterprises. Highlighting

theoretical foundations and real-world applications, this book is ideally designed for professionals, practitioners, researchers, and upper-level students interested in emerging perspectives on knowledge management.

Handbook of the Sharing Economy

Russell W. Belk 2019 With the radical growth in the ubiquity of digital platforms, the sharing economy is here to stay. This Handbook explores the nature and direction of the sharing economy, interrogating its key dynamics and evolution over the past decade and critiquing its effect on society.

Entwicklung von Modellen generischer Managementprozesse für die Gestaltung und Lenkung prozessorientierter Unternehmen Li Xiang 2016-01-13

Proceedings of the 7th World

Conference on Mass Customization, Personalization, and Co-Creation (MCPC 2014), Aalborg, Denmark, February 4th - 7th, 2014

Thomas D. Brunoe 2014-01-28 The MCPC 2014 is a multi-track conference featuring a combination of high profile keynotes with expert talks, panel discussions, paper sessions, workshops, receptions, and much more. While it is devoted to sharing and discussing the latest research in the field, the MCPC conference has a strong focus on real life applications. Since its beginning, the MCPC conference has had an equal share of participants, practitioners and academics/researchers. This makes the MCPC conference truly unique among many conferences. It strives to connect MCPC thinkers, first movers, entrepreneurs, technology developers,

and researchers with people applying these strategies in practice. Twenty years ago Mass Customization was acknowledged as the "New Frontier in Business Competition". Ever since, industry has been applying the concept and researchers have developed the topic into a well-established research area and businesses have formed new strategies. More knowledge, methods and technologies are available now than ever before. Along with general Mass Customization topics, this conference addresses Mass Customization from a historical perspective, looking at both mass customization in the past 20 years and towards the new frontiers in the 20 years to come. This book presents the latest research from the worldwide MCPC community bringing

together the new thoughts and results from various disciplines within the field.

Industry 4.0 in Textile Production

Yves-Simon Gloy 2021-01-05 This book discusses the design of textile production within the framework Industry 4.0. Relevant research topics in the textile industry are identified and solutions are conceptualized, developed and implemented. This is followed by an evaluation of the solutions in which, among other things, the profitability is considered. Questions about the transfer of knowledge into the company complete the work. Industry 4.0 in Textile Production provides a rich investigation into and survey of textile production The informative cases studies, clear perspective, and detailed analysis make this book of

great use to engineers, researchers and postgraduate students interested in the textile industry.

Rural Entrepreneurship and Innovation in the Digital Era Lokuge, Sachithra

2020-11-06 Though entrepreneurship has been studied for decades, in recent years, the study of “rural entrepreneurship” has emerged as an upcoming subtopic of the area. With the growth and continual ease of utilizing digital technologies to support entrepreneurial activities, these technologies now provide unique opportunities for advancing rural entrepreneurship. Though prior research focused on challenges for IT use in rural areas that specifically investigated investment and management issues, it is important to study all challenges and opportunities involved in this

developing area of research. Rural Entrepreneurship and Innovation in the Digital Era is a pivotal reference source that provides vital research on the utilization of digital technologies in rural business ventures. Unlike other references, this book studies the conceptualization process of rural entrepreneurship and innovation with the intention of providing guidelines and support for entrepreneurs. While highlighting topics such as microfinancing, risk management, and rural development, this publication explores innovative practices as well as the methods of IT investment and management. This book is ideally designed for business professionals, entrepreneurs, business researchers, academics, and business students.

Environmental Management Accounting

Christian Herzig 2012-03-15
Sustainable development will not happen without substantial contributions from and leading roles of companies and business organizations. This requires the provision of adequate information on corporate social and ecological impacts and performance. For the last decade, progress has been made in developing and adapting accounting mechanisms to these needs but significant work is still needed to tackle the problems associated with conventional accounting. Until recently, research on environmental management accounting (EMA) has concentrated on developed countries and on cost-benefit analysis of implementing individual EMA tools. Using a comparative case study design, this book seeks to redress

the balance and improve the understanding of EMA in management decision-making in emerging countries, focussing specifically on South-East Asian companies. Drawing on 12 case studies, taken from a variety of industries, Environmental Management Accounting: Case Studies of South-East Asian Companies explores the relationship between decision situations and the motivation for, and barriers to, the application of clusters of EMA tools as well as the implementation process itself. This book will be useful to scholars interested in the environmental and sustainability management accounting research field and those considering specific approaches to EMA within emerging economies.

Free Innovation Eric Von Hippel

2016-11-10 A leading innovation scholar explains the growing phenomenon and impact of free innovation, in which innovations developed by consumers and given away "for free." In this book, Eric von Hippel, author of the influential Democratizing Innovation, integrates new theory and research findings into the framework of a "free innovation paradigm." Free innovation, as he defines it, involves innovations developed by consumers who are self-rewarded for their efforts, and who give their designs away "for free." It is an inherently simple grassroots innovation process, unencumbered by compensated transactions and intellectual property rights. Free innovation is already widespread in national economies and is steadily increasing in both scale and scope.

Today, tens of millions of consumers are collectively spending tens of billions of dollars annually on innovation development. However, because free innovations are developed during consumers' unpaid, discretionary time and are given away rather than sold, their collective impact and value have until very recently been hidden from view. This has caused researchers, governments, and firms to focus too much on the Schumpeterian idea of innovation as a producer-dominated activity. Free innovation has both advantages and drawbacks. Because free innovators are self-rewarded by such factors as personal utility, learning, and fun, they often pioneer new areas before producers see commercial potential. At the same time, because they give away their innovations, free

innovators generally have very little incentive to invest in diffusing what they create, which reduces the social value of their efforts. The best solution, von Hippel and his colleagues argue, is a division of labor between free innovators and producers, enabling each to do what they do best. The result will be both increased producer profits and increased social welfare—a gain for all.

Emerging Issues And Trends In Innovation And Technology Management
Alexander Brem 2021-10-25 This book is a compilation of papers published in International Journal of Innovation and Technology Management. The chapters in the book focus on recent developments in the field of innovation and technology management. Carefully selected on the basis of

relevance, rigor and research, the chapters in the book take the readers through various emerging topics and trends in the field. Written in a simple and accessible manner, the chapters in this book will be of interest to academics, practitioners and general public interested in knowing about emerging trends in innovation and technology management.

Dokumentenlogistik als Erfolgsfaktor in deutschen Banken Gernot Kaiser
2009-06-25 Bedingt durch den immateriellen Charakter der Dienstleistungserstellung in Banken werden originäre Informations- und Datenströme sehr selten aus logistischer Perspektive betrachtet. Auf der Basis einer empirischen Untersuchung zeigt Gernot Kaiser die strategische Erfolgswirkung der Logistik in Banken sowie eine bisher

kaum beachtete Möglichkeit zur Differenzierung im Wettbewerb auf. Konkrete Handlungsempfehlungen für die praktische Gestaltung der Dokumentenlogistik runden die Arbeit ab.

Contemporary Issues in Business

Ethics Mary W. Vilcox 2007 Business ethics is a form of the art of applied ethics that examines ethical rules and principles within a commercial context, the various moral or ethical problems that can arise in a business setting, and any special duties or obligations that apply to persons who are engaged in commerce. Business ethics can be both a normative and a descriptive discipline. As a corporate practice and a career specialisation, the field is primarily normative. In academia descriptive approaches are

also taken. The range and quantity of business ethical issues reflects the degree to which business is perceived to be at odds with non-economic social values. Historically, interest in business ethics accelerated dramatically during the 1980s and 1990s, both within major corporations and within academia. For example, today most major corporate websites lay emphasis on commitment to promoting non-economic social values under a variety of headings (e.g. ethics codes, social responsibility charters). In some cases, corporations have redefined their core values in the light of business ethical considerations. Catching business ethics in action, however, remains a seldom-spotted nugget for in reality it depends on the characters of the characters.

Challenges and Opportunities in the Due Diligence Process Christoph Müller 2020-12-14 Volumina von M&A-Transaktionen steigen. Die Gründe sind vielfältig, die Tendenz ist branchenübergreifend und unabhängig von der Unternehmensgröße. Doch viele Transaktionen liefern nicht das avisierte Resultat. Zeit für einen innovativen Ansatz im entscheidungsrelevanten M&A-Teilprozess Due Diligence. Dabei werden die Herausforderungen der für den Prozess nur limitiert zur Verfügung stehenden Ressourcen Zeit und Know-how abgearbeitet. Der Ansatz löst sich von den Retrospektiven und bildet zudem Nachhaltigkeit und Zukunftsorientierung mit ab. Heraus kommt ein Due-Diligence-Modell, das den Anspruch erhebt, die Qualität der Handlungsempfehlung zu erhöhen. Das

Buch richtet sich an Kauf- und Verkaufsseite, sowie externe Berater gleichermaßen.

Perspectives on the Sharing Economy Indre Maurer 2019-08-15 Sharing instead of owning is one of the major trends in modern (business) life. By changing how people consume, the rise of the sharing economy has the potential to redefine the role of owners, consumers and producers, change their mode of transaction, create innovative business models, disrupt existing industries, and challenge political and regulative institutions. In addition to these practical implications, the sharing economy phenomenon represents a novel playground for theoretical advancement, attracting a multitude of research and researchers from different disciplines. While this can

potentially open up new avenues for practice and theory to stimulate each other, they do not seem to go hand-in-hand at the moment. This volume brings together research from a wide variety of theoretical backgrounds and disciplines to encourage academic discourse on the sharing economy phenomenon. It comprises contributions that are grounded in different theoretical perspectives, including business history, economics, strategic management, organization studies, information systems, political science, legal studies, linguistics, and semantics. While all contributions focus on the sharing economy phenomenon, they examine the subject from different disciplinary angles. Together, they provide a coherent and comprehensive overview of research on the sharing

economy.

Beyond Fintech: Technology Applications For The Islamic Economy

Hazik Mohamed 2020-11-25 Beyond Fintech: Technology Applications for the Islamic Economy is a follow-up to the first-ever Islamic Fintech book by the author (published in 2018) that provided linkages between Islamic Finance and disruptive technologies like the blockchain. In the wake of fintech as a new trend in financial markets, the groundbreaking book stressed the relevance of Islamic finance and its implications, when enabled by fintech, towards the development of the Islamic digital economy. While the earlier work discussed the crucial innovation, structural, and institutional development for financial technologies in Islamic

Finance, this new research explores the multiple applications possible in the various sectors of the economy, within and beyond finance, that can be significantly transformed. These revolutionary applications involve the integration of AI, blockchain, data analytics, and Internet-of-Things (IoT) devices for a holistic solution to tackle the bottlenecks and other issues in existing processes of traditional systems. The principles of accountability, duty, justice, and transparency are the foundation of shaping the framework in achieving good governance in all institutions – public or private, Islamic or otherwise. Technologies like AI, blockchain, and IoT devices can operationalize the transparency and accountability that is required to eradicate poverty, distribute

wealth, enhance micro-, small- and large-scale initiatives for social and economic development, and thus share prosperity for a moral system that enables a more secure and sustainable economy.

Innovation from Emerging Markets

Fernanda Cahen 2021-01-31 In recent years, emerging markets have come to represent the largest share of global GDP and have made gains in economic development and political influence. In turn, emerging market companies have taken on a new level of importance in driving innovation, local development and global competition. Advancing an integrative view that captures the diversity of innovation among companies in emerging markets, this book highlights the rapid evolution of emerging markets from imitators to

innovation leaders. Building upon research conducted by the Emerging Multinational Research Network (EMRN) in collaboration with several universities in North and South America, Europe and China, this rich and expansive collection includes studies of innovation in regions yet to receive focused analysis in the field. The authors also re-examine dominant theories of innovation and capability creation based on a broad range of case studies and research insights. Offering a taxonomy of emerging market innovations, this collection reveals the unique drivers, types, and outcomes of innovation in emerging markets.

The New Production of Users Sampsa Hyysalo 2016-04-20 Behind the steady stream of new products, technologies, systems and services in our modern

societies there is prolonged and complicated battle around the role of users. How should designers get to know the users' interests and needs? Who should speak for the users? How may designers collaborate with users and in what ways may users take innovation into their own hands? The New Production of Users offers a rare overview of these issues. It traces the history of designer-user relations from the era of mass production to the present days. Its focus lies in elaborating the currently emerging strategies and approaches to user involvement in business and citizen contexts. It analyses the challenges in the practical collaborations between designers and users, and it investigates a number of cases, where groups of users collectively took

charge of innovation. In addition to a number of new case studies, the book provides a thorough account of theories of user involvement as well as and offers further developments to these theories. As a part of this, the book relates to the wide spectrum of fields currently associated with user involvement, such as user-centered design, participatory design, user innovation, open source software, cocreation and peer production. Exploring the nexus between users and designers, between efforts to democratize innovation and to mobilize users for commercial purposes, this multi-disciplinary book will be of great interest to academics, policy makers and practitioners in fields such as Innovation Studies, Innovation Policy, Science and Technology

Studies, Cultural Studies, Consumption studies, Marketing, e-commerce, Media Studies as well as Design research.

Wertegeleitete Unternehmensführung

Martin Büscher 2020-10-22 Eine systematische Befragung von 25 Führungspersönlichkeiten in privatwirtschaftlichen und diakonischen Unternehmen macht deutlich, dass Werte – mehr oder weniger explizit – eine leitende Bedeutung für unternehmerisches Handeln haben. Daraus lassen sich Überlegungen für eine Unternehmenstheorie ableiten, in denen dieser Umstand angemessen eingearbeitet wird. Werte stehen dabei nicht nur für eine idealistische Orientierung am sinnerfüllten Leben, verantwortlichen Handeln oder Nachhaltigkeit, sondern

auch an wertebasierten Kategorien wie Gewinnerzielung, Wettbewerb oder Leistung. In Abgrenzung zu faktortheoretischen Ansätzen der Betriebswirtschaftslehre werden Elemente einer Unternehmenstheorie entfaltet, die implizite und explizite Wertedimensionen zu berücksichtigen in der Lage ist. Werte können dabei wertschöpfend wirken. Außerdem können aus dem Buch Anregungen für die eigene Gestaltung von Organisationen aufgenommen werden, mit der die Werte der Organisation in der Praxis wirklich berücksichtigt werden.

Moderne Konzepte des organisationalen Marketing Thorsten Kliewe 2014-01-16

□Das Buch widmet sich dem organisationalen Marketing, d. h. Marketing gegenüber Organisationen aller Art als Zielgruppen. Es werden

neue Erkenntnisse aus der Theorie und Praxis des Business-to-Business- und des Science-to-Business Marketing aufgezeigt.

Women's Entrepreneurship in Europe

Stephanie Birkner 2018-09-21 This volume addresses the current challenges for and future prospects of women's entrepreneurship research, bringing together a wealth of diverse insights with implications for research, education and practice alike. Presenting theoretical and empirical research papers and case studies, the book not only offers a topical reference guide for entrepreneurship researchers and educators, but also provides essential reading material for students interested in questions addressing diverse aspects of the challenges to and future academic and

practical prospects of women's entrepreneurship.

Market Engineering Henner Gimpel 2021

This open access book provides a broad range of insights on market engineering and information management. It covers topics like auctions, stock markets, electricity markets, the sharing economy, information and emotions in markets, smart decision-making in cities and other systems, and methodological approaches to conceptual modeling and taxonomy development. Overall, this book is a source of inspiration for everybody working on the vision of advancing the science of engineering markets and managing information for contributing to a bright, sustainable, digital world. Markets are powerful and extremely efficient mechanisms for coordinating

individuals' and organizations' behavior in a complex, networked economy. Thus, designing, monitoring, and regulating markets is an essential task of today's society. This task does not only derive from a purely economic point of view. Leveraging market forces can also help to tackle pressing social and environmental challenges. Moreover, markets process, generate, and reveal information. This information is a production factor and a valuable economic asset. In an increasingly digital world, it is more essential than ever to understand the life cycle of information from its creation and distribution to its use. Both markets and the flow of information should not arbitrarily emerge and develop based on individual, profit-driven actors.

Instead, they should be engineered to serve best the whole society's goals. This motivation drives the research fields of market engineering and information management. With this book, the editors and authors honor Professor Dr. Christof Weinhardt for his enormous and ongoing contribution to market engineering and information management research and practice. It was presented to him on the occasion of his sixtieth birthday in April 2021. Thank you very much, Christof, for so many years of cooperation, support, inspiration, and friendship.

Trust in the European Union in Challenging Times Antonina

Bakardjieva Engelbrekt 2018-06-13

This is the first book in the Interdisciplinary European Studies collection. This volume provides an interdisciplinary perspective on

trust in the EU from the vantage point of political science, law and economics. It applies insights from a number of different dimensions – political institutions, legal convergence in criminal and civil law, social trust, digitalization, the diffusion of political values and norms, monetary convergence and the legitimacy of political systems – to approach the highly complex issue of trust in the EU in a clear-sighted, relevant and insightful manner. Written by renowned experts in the field, the style is accessible and reader-friendly, yet concise, knowledgeable and thought-provoking. The individual chapters combine up-to-date research findings with reflections on on-going political debates and offer useful, concrete ideas on what steps the EU could take

to address the challenge of trust. The book provides the reader with invaluable insights into how trust, or rather the lack of trust, poses a challenge to the future of the social, economic and political developments in the EU. It is a must-read for policy-makers, students and interested members of the public who feel concerned by the future of Europe.

Organisationsentwicklung Fritz Gairing 2017-08-23 Nur wer sich entwickelt überlebt. Das wissen wir nicht erst seit Charles Darwin. Komplexität und Dynamik treiben heute wirtschaftliche Prozesse in rasantem Tempo voran. Märkte, Technologien, Globalisierung, Digitalisierung und die mit Macht hereinbrechende vierte Industrielle Revolution zwingen Unternehmen zu tiefgreifenden

Veränderungsprozessen. Wie können strategische, strukturelle und soziale Dimensionen der Veränderung in einem Unternehmen integrativ und professionell geplant, organisiert und gesteuert werden? Dieses Buch gibt Antworten: Es erläutert die wissenschaftlichen Wurzeln, erklärt die zentralen theoretischen Konzepte und beschreibt ganz praktisch das Handwerkszeug bei der Planung und Gestaltung von Organisationsentwicklungsprozessen - mit besonderem Augenmerk auf aktuelle Herausforderungen.

Innovation and Entrepreneurship John R. Bessant 2015-06-08 Innovation and Entrepreneurship 3rd Edition is an accessible text on innovation and entrepreneurship aimed specifically at undergraduate students studying business and management studies, but

also those on engineering and science degrees with management courses. The text applies key theories and research on innovation and entrepreneurship and then reviews and synthesises those theories and research to apply them in a much broader and contemporary context, including the corporate and public services, emerging technologies and economies, and sustainability and development and creating and capturing value from innovation and entrepreneurship. In this third edition the authors continue to adopt an explicit process model to help organise the material with clear links between innovation and entrepreneurship. This text has been designed to be fully integrated with the Innovation Portal at www.innovation-portal.info, which

contains an extensive collection of additional resources for both lecturers and students, including teaching resources, case studies, media clips, innovation tools, seminar and assessment activities and test questions.

Kompetenz, Interdisziplinarität und Komplexität in der Betriebswirtschaftslehre Wolfgang Kersten 2013-08-15 □Die Festgabe für Klaus Bellmann zum 70. Geburtstag enthält 27 Beiträge, die seine Schüler, Kollegen und Freunde ihm zu Ehren gewidmet haben. Sie spiegeln die weiten interdisziplinären Forschungsfelder Klaus Bellmanns wider, die von Innovations- und Technologiemanagement, Kompetenz- und Netzwerkmanagement, Komplexen Systemen, Produktions- und Logistikmanagement, Qualitäts- und

Umweltmanagement sowie angrenzenden Disziplinen geprägt sind.

Die Unternehmung 2011

Venture Capital in Switzerland Jens Engelhardt 2010

Analyse und Gestaltung technischer Leistungspotentiale herstellerunabhängiger

Instandhaltungsdienstleister Markus Klotzbach 2016-04-26 Die Wahrnehmung technischer Dienstleistungen hat sich mit der Implementierung schlanker arbeitsteiliger Produktions- und Leistungssysteme vom Kostenfaktor zum integrativen Bestandteil der Wertschöpfung gewandelt. So leisten etwa Instandhaltungsdienstleister durch die Sicherstellung der bedarfsgerechten Verfügbarkeit der technischen Anlagen ihrer Kunden einen unverzichtbaren Beitrag zur Funktionsfähigkeit schlanker

Wertschöpfungsstrukturen.

Herstellerunabhängige

Instandhaltungsdienstleister spielen in diesem Zusammenhang eine zunehmend wichtigere Rolle. Sie sorgen mit ihrem Leistungsangebot dafür, dass Betreiber technischer Anlagen alternative Beschaffungsmöglichkeiten zum oftmals monopolistisch geprägten Service- und Ersatzteilgeschäft der Hersteller haben. Infolge zunehmender technologie- und wettbewerbsinduzierter Dynamik in der Servicebranche sind herstellerunabhängige Instandhaltungsdienstleister jedoch verstärkt darauf angewiesen, ihre interne Leistungsbereitschaft systematisch zu planen und proaktiv zu gestalten. Vor diesem Hintergrund entwickelt der Autor eine Methode, die herstellerunabhängige

Instandhaltungsdienstleister bei der systematischen (Weiter-)Entwicklung ihrer technischen Leistungsbereitschaft unterstützt. Die Methode bildet die wichtigsten praxisrelevanten Entscheidungsfälle, die sich aus der technischen Reife des Instandhaltungsobjekts und der Wertschöpfungstiefe ergeben, ab. Durch den modularen Methodenaufbau wird die bestmögliche Verarbeitung der zum Entscheidungszeitpunkt verfügbaren qualitativen und quantitativen Informationen ermöglicht. Als Ergebnis des Methodeneinsatzes erhalten Anwender konkrete Handlungsempfehlungen zur Ausrichtung ihrer technischen Ressourcen und Fähigkeiten. Um die Praxistauglichkeit der Methode zu gewährleisten, werden die Anforderungen herstellerunabhängiger

Instandhaltungsdienstleister verschiedener Branchen in der Methodenentwicklung berücksichtigt. Die Funktionalität der Methode und die Plausibilität der Ergebnisse werden im Rahmen von Fallstudien in der Instandhaltungspraxis bestätigt.

Online Intermediaries for Co-Creation
Christoph W. Künne 2017-05-15 This book investigates the powerful role of online intermediaries, which connect companies with their end customers, to facilitate joint product innovation. Especially in the healthcare context, such intermediaries deploy interactive online platforms to foster co-creation between engaged healthcare consumers and innovation-seeking healthcare companies. In three empirical studies, this book outlines the key characteristics of online

intermediaries in healthcare, their distinct strategies, and the remaining challenges in the field. Readers will also be introduced to the stages companies go through in adopting such co-created solutions. As such, the work appeals for both its academic scope and practical reach.

Management in Nonprofit-Mikrofinanzorganisationen Alexander Pinz 2017-05-03 Alexander Pinz konzeptualisiert den Erfolg und Misserfolg von Nonprofit-Organisationen allgemein als multi-dimensionales Konstrukt. Dieses Erfolgsverständnis nutzt er, um Erfolgsfaktoren von Mikrofinanzorganisationen in der entwicklungsökonomischen Literatur zu identifizieren. Durch die Analyse der Wertschöpfungsprozesse von sieben

bolivianischen und sieben peruanischen Nonprofit-Mikrofinanzorganisationen hebt der Autor die Bedeutung der Organisationskultur für das erfolgreiche Management von Nonprofit-Mikrofinanzorganisationen im Kontext von institutioneller Pluralität hervor. Die Erarbeitung von Wettbewerbsstrategien für diesen Organisationstypus im Rahmen einer Wertschöpfungskonfigurationsanalyse unterstreicht den Praxisbezug der Arbeit.

Open Tourism Roman Egger 2016-03-02 This book examines the concepts of open innovation, crowdsourcing and co-creation from a holistic point of view and analyzes them considering their suitability to the tourism industry. Methods, theories and models are discussed and examined

regarding their practical applicability in tourism. The book illustrates the theoretical mechanisms and principles of Open Innovation, Crowdsourcing and Co-creation with case studies and best practices examples. In addition to the scientific target group, the book is a useful resource for managers of the entire tourism industry. First, the book presents the theoretical fundamentals and concepts in 11 specific chapters. This basis is then enriched by three parts with case studies, focusing on information, creation and provision respectively. Finally in a concluding part the editors sum up the book and give an outlook on the implications, learnings and future perspectives of open innovation, crowdsourcing and collaborative consumption in the

tourism industry.
The Future of Management Education
Stéphanie Dameron 2017-01-25 This book discusses the new challenges facing Business Schools around the world with potential scenarios that may be envisioned for 2030 and strategies for stakeholders. Based on documented descriptions of competitive dynamics in the 'business' of business schools in a variety of countries, the authors highlight the fact that the 'industry' of management education is going through major changes such as new governance and business models, mergers and acquisitions, internationalization of faculty and students coexisting with entrenchment in local markets, ever more needs for financial resources, development of distant and blended learning, and

increasing pressure for research output to boost rankings. With concerns surrounding the sustainability of current trends in faculty salary inflation, social acceptability of higher fees, cost of distance learning and the risk of an academic-industry divide around knowledge produced by management research, *The Future of Management Education* develops an analysis of business models and institution

regulation. The two volumes cover the context of Business Schools in ten countries and grapples with the challenges they currently face. They specifically discuss foresight scenarios and strategic implications for stakeholders (Deans, faculty, students, prospective students, alumni, local businesses, corporations, government, accreditation bodies).
