Airport Competition Regulation in Europe

Stamatis Varsamos 2016-10-15 Over the past thirty years, airports within the EU - including nearly a hundred newly built or rebuilt during that time - have undergone a major economic transformation. From mere infrastructure providers, airports have become diversified and complex commercial enterprises in competition with each other. This is the first and only book thus far to deal with the legal issues surrounding this important development, focusing on the impact of EU Directive 12/2009 on airport charges. Examining the use of airport infrastructure, the growing competition among airports, and the relations between airlines and airports, the author, a leading aviation law practitioner, covers such issues and topics as the following: - types of charges - landing, passenger, aircraft parking; - pricing factors determining airport charges; - vertical contractual relations between airports and airlines; - airport market power and dominance; - issues of consultation and transparency; - ability of airlines and passengers to switch to alternative airports; - application of state aid rules; - security charges; - environmental charges and schemes; and - price discrimination and differentiation. The presentation encompasses a critical analysis of the findings of case law, both international and European, on airport charges in the context of the new trend of airports and airlines concluding vertical agreements. As an examination of the economic regulation of EU airports due to the liberalization process, structural changes in the

ownership status of many EU airports, and the emergence of new airline business models (such as low-cost carriers), this book, the only one of its kind, will quickly become indispensable to practitioners, policymakers, and academics in aviation law.

Glocalized Solutions for Sustainability in

Manufacturing Jürgen Hesselbach 2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering (LCE) 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment, product development, sustainable manufacturing and end-of-life-management. The theme "Glocalized Solutions for Sustainability in Manufacturing" addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products, services and processes taking into account local capabilities and constraints to achieve an economically, socially and environmentally sustainable society in a global perspective. Glocalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions. Products and services need to be addressed that ensure a high standard of living everywhere. Resources required for manufacturing and use of such products are limited and not evenly distributed in the world. Locally available resources, local

capabilities as well as local constraints have to be drivers for product- and process innovations with respect to the entire life cycle. The 18th CIRP International Conference on Life Cycle Engineering (LCE) 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas.

Global Operations Strategy Yeming Gong

2013-07-01 While many business schools are teaching Global Operations Strategy with self-made teaching materials, there are no such textbooks. Combining practical approaches with detailed theoretical underpinnings, this book provides theories, tools, frameworks, and techniques for global operations strategy, and brings real world perspectives to students and managers. Each chapter includes definition of key terms, introduction of fundamental theories, several short case examples, one long new case to explain the associated theories, and recommended further reading.

Making the Grade William A. Fischel 2009-11-15

A significant factor for many people deciding where to live is the quality of the local school district, with superior schools creating a price premium for housing. The result is a "race to the top," as all school districts attempt to improve their performance in order to attract homebuyers. Given the importance of school districts to the daily lives of children and families, it is surprising that their evolution has not received much attention. In this provocative book, William Fischel argues that the historical development of school districts reflects Americans' desire to make their communities attractive to outsiders. The result has been a standardized, interchangeable system of education not overly demanding for either students or teachers, one that involved parents and local voters in its governance and finance. Innovative in its focus on bottom-up processes generated by individual behaviors rather than top-down decisions by bureaucrats, Making the Grade provides a new perspective on education reform that emphasizes how public schools form the basis for the localized social capital in American towns and cities.

War Along the Border Arnaldo De León 2011

Scholars contributing to this volume consider topics ranging from the effects of the Mexican

Revolution on Tejano and African American communities to its impact on Texas' economy and agriculture. Other essays consider the ways that Mexican Americans north of the border affected the course of the revolution itself. .

Islamic Palace Architecture in the Western Mediterranean Felix Arnold 2017-02-14 Palaces like the Aljafería and the Alhambra rank among the highest achievements of the Islamic world. In recent years archaeological work at Córdoba, Kairouan and many other sites has vastly increased our knowledge about the origin and development of Islamic palatial architecture, particularly in the Western Mediterranean region. This book offers a comprehensive and up-to-date overview of Islamic palace architecture in Spain, Morocco, Algeria, Tunisia and southern Italy. The author, who has himself conducted archaeological field work at several prominent sites, presents all Islamic palaces known in the region in ground plans, sections and individual descriptions. The book traces the evolution of Islamic palace architecture in the region from the 8th to the 19th century and places them within the context of the history of Islamic culture. Palace architecture is a unique source of cultural history, offering insights into the way space was conceived and the way rulers used architecture to legitimize their power. The book discusses such topics as the influence of the architecture of the Middle East on the Islamic palaces of the western Mediterranean region, the role of Greek logic and scientific progress on the design of palaces, the impact of Islamic palaces on Norman and Gothic architecture and the role of Sufism on the palatial architecture of the late medieval period.

Foundations of Computational Intelligence Ajith Abraham 2009-05-01 Foundations of Computational Intelligence Volume 6: Data Mining: Theoretical Foundations and Applications Finding information hidden in data is as theoretically difficult as it is practically important. With the objective of discovering unknown patterns from data, the methodologies of data mining were derived from statistics, machine learning, and artificial intelligence, and are being used successfully in application areas such as bioinformatics, business, health care, banking, retail, and many others. Advanced representation schemes and computational

intelligence techniques such as rough sets, neural networks; decision trees; fuzzy logic; evolutionary algorithms; artificial immune systems; swarm intelligence; reinforcement learning, association rule mining, Web intelligence paradigms etc. have proved valuable when they are applied to Data Mining problems. Computational tools or solutions based on intelligent systems are being used with great success in Data Mining applications. It is also observed that strong scientific advances have been made when issues from different research areas are integrated. This Volume comprises of 15 chapters including an overview chapter providing an up-to-date and state-of-the research on the applications of Computational Intelligence techniques for Data Mining. The book is divided into 3 parts: Part-I: Data Click Streams and Temporal Data Mining Part-II: Text and Rule Mining Part-III: Applications Part I on Data Click Streams and Temporal Data Mining contains four chapters that describe several approaches in Data Click Streams and Temporal Data Mining.

Foreign investment in eastern and southern Europe after 2008. Béla Galgóczi 2015-12-01 This book investigates the role that foreign

direct investment (FDI) in central-eastern and southern Europe has played in the post-crisis period, comparing patterns across countries and sectors. An overarching objective of this publication is to assess the extent to which FDI can still be seen as a key driver of economic development, modernisation and convergence for Europe's low- and middle-income economies, taking into account also the risks and limiting factors associated with FDI.

La Familia Drug Cartel: Implications for U.S.-Mexican Security

George W. Grayson
Auto Brand Anders Parment 2014-01-03 The car - once everybody's dream and a key status symbol in most countries and cultures - has been extensively questioned in the last decades and in the last few years particularly. Urbanisation, traffic congestion, pollution problems, heavy reliance on scarce oil supplies, safety issues and ever-growing competition, have all provided significant business challenges for the automotive industry. Many car manufacturers have had to fundamentally rethink their design, brand and marketing strategies to thrive in a savvy, consumer-led culture, and markets that are becoming increasingly restrictive in size and opportunity. Auto Brand provides a roadmap to branding and marketing success in the automotive industry from a leading industry expert and features:

- Case studies on major car brands personally conducted by the author including: Audi, BMW, Holden, Mercedes-Benz, Opel, Porsche, Saab, Seat, Skoda, Vauxhall, Volkswagen, and Volvo
- The findings from 100 interviews conducted with CEOs, marketing managers, sales managers, sales people, after sales managers at all levels from the manufacturer level to small rural dealers, as well as industry experts, policy makers, free-standing repair shops and professional organizations
- The results of a new international study on car buyer behaviour based on 4,700 survey answers

Auto Brand is essential reading for marketing managers, sales managers, CEOs, development managers and dealers in all types of companies in the car industry including: manufacturers, national sales companies/importers, dealers, finance companies, insurance companies, free-standing repair shop channels and more. The first book to specifically address how to deal with the

challenges facing the automotive industry it illustrates how companies can take advantage of new technologies, adapt to emerging trends in consumer behaviour, improve profitability and build even more successful brands in the future.

Car-tastrophes Honest John 2016-10-15

Automakers are as prone to turn out clunkers as politicians are to lie. Their cars may be ugly, misconceived, badly built, diabolical to drive, ridiculously thirsty, or just plain unreliable. So which were the worst of the past 20 years?

Detroit's Michigan Central Station Kelli B.

Kavanaugh 2001 In 1913, the Michigan Central Station opened its majestic entrances to the people of Detroit. Designed by Warren & Wetmore and Reed & Stern, the firms also noted as the architects of the Grand Central Station in New York City, the depot was a marvel of grandeur and comfort for the traveler lucky enough to utilize its facilities. Soldiers went to war, families both separated and rejoined, and folks looking for an honest living in the Motor City all walked the Michigan Central's elegant corridors. Since the last train pulled away from the station in 1988, the structure has fallen prey to rapidly paced deterioration. Detroit's Michigan Central Station captures the glory of the Michigan Central and its environs. Using photographs from the Burton Historical Collection, as well as private collections, the book illustrates the use of the Michigan Central Station by a city whose story dramatically parallels that of this magnificent structure. The book also includes imagined futures of the station from some of the many people who have been inspired by the magic this grand building continues to exude.

Zero Carbon Car Brian Long 2013-03-01 The Zero Carbon Car examines the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint, and the adaptation of the automotive industry to changing technology in a world where environmental issues are becoming ever more prevalent. The book's in-depth research into green car technology shows that manufacturers make concerted efforts, but sometimes also defeat the gains of their innovation. Topics covered include: What is meant by the terms 'global warming' and 'green', and how these can be defined; An account of the long history of green automotive technology; Alternative fuels, including diesel and hydrogen; Developments in environmentally friendly engine technology; Electric cars; Environmental issues in material usage and car body manufacture. A wide-ranging survey of the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint. Written in an easy-to-understand manner, the book enables the reader to fully understand what is meant by 'global warming'. Examines alternative fuels, material usage and the motive power options available to us. Superbly illustrated with 350 colour photographs. Brian Long is a professional writer and motoring historian with over sixty books to his credit.

The Automotive Industry and European Integration A. J. Jacobs 2019-08-07 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Digital Jihad Erik Skare 2016-10-15 A new and innovative form of dissent has emerged in response to the Israeli occupation of Palestine. Dubbed "electronic jihad", this approach has seen organized groups of Palestinian hackers make international headlines by breaching the security of such sites as the Tel Aviv Stock Exchange, AVG, Avira, Whatsapp, and BitDefender. Though initially confined to small clandestine groups, "hacktivism" is now increasingly being adopted by militant Palestinian parties, including Hamas and Palestinian Islamic Jihad, who have gone so far as to incorporate hackers into their armed brigades. Digital Jihad is the first book to explore this rapidly evolving and still little understood aspect of the Palestinian resistance movement. Drawing on extensive interviews with hackers and other activists, it provides a unique and fascinating new perspective on the Palestinian struggle.

Regarding Educacion Bryant Jensen 2012 The "Latino Education Crisis" not only threatens to dash the middle class aspirations of the nation's largest immigrant group, it is also an ominous sign for democratic engagement and global competitiveness for U.S. society as a whole. This timely book argues that this crisis is more aptly characterized as a "Mexican Education Crisis." This book brings together voices that are rarely heard on the same stage—Mexican and U.S. scholars of migration, schooling, and human development—to articulate a new approach to Mexican-American schooling: a bi-national focus that highlights the interpersonal assets of Mexican-origin children. Contributors document the urgency of adopting this approach and provide a framework for crossing national and disciplinary borders to improve scholarship, policy, and practice associated with PreK-12 schooling. Contributors: James D. Bachmeier, Frank D. Bean, Susan K. Brown, Benilde García Cabrero, Cynthia García Coll, Regina Cortina, Ivania de la Cruz, Guadalupe Ruiz Cuéllar, Claudia Galindo, Francisco X. It represents a first step in what we hope will be an ongoing relationship between the institutions and the researchers on both sides of the border who have both an appreciation for the importance of this work and a dedication to improving the educational opportunities of those students that we share in time, space, and culture." —From the Foreword by Patricia Gándara and Eugene García "A fresh, eye-opening array of essays that highlights how the economic and cultural vitality of the U.S. and Mexico is so tightly interwoven in colorful and breathtaking ways. Setting aside strident allegations of how immigrants differ from mainstream society, the authors illustrate our commonalities, how Mexican parents are among the most pro-family, hardest working families in our society. 'Bien educado' is not just metaphor: it animates how immigrant parents
