Porsche 928, 924, 944 and 968

Marc Cranswick 2016-03-28

Porsche AG, today the most profitable car company in the world, was in 1975 a small but headstrong German automaker on the verge of its most significant development. New national laws were changing the way manufacturers designed

their products, but the auto consumer was also craving more exciting and innovative design. That innovation came in 1975 with the release of the revolutionary Porsche 924. This book begins its analysis with the creation of the Porsche 924 and the impact it made on the automotive world. During the 1980s, Porsche honed earlier 924 designs to create the 944 and its Turbo and convertible variants,

and later the 968, completing a line that has produced some of the most respected sports cars of the modern era. The text also follows in detail the long production life and development of Porsche's V-8 powered high performance grand tourer, the 928—introduced in 1977, named the 1978 European Car of the Year and culminating in the 350 bhp 928 GTS of the 1990s. This history of the dynamic Porsche family gives a full account of each model and reveals the unique contributions each has made to a constantly evolving automotive world.

VW Beetle Specification Guide

1949-1967 Richard Copping

2018-10-31 The VW Beetle is one of the best-loved of all classic cars, with many thousands preserved across the world, many in regular use. Over the years countless changes were introduced, together making a mid sixties Beetle, for instance, very different from one built in the mid-50s, or mid-70s, despite the obvious similarities. With the aid of hundreds of full colour photographs this new edition in paperback documents all the Beetle's specification changes and model differences during the classic period 1949-67, making it possible to determine the original specification and fittings of any Beetle from this period. Uses the same format as for the highly successful VW Transporter spec guides. Aimed at early-Beetle

owners and enthusiasts. Superbly illustrated with 300 colour photographs. New edition in paperback for 2018.

VW Camper and Microbus

Richard Copping 2011-10-20 The Volkswagen Transporter is one of the best-loved and most recognisable motor vehicles of all time. The preferred transport for surfers and hippies everywhere, the Volkswagen Type 2 'bus' was born in 1950, and became the first of a new breed of vehicle, the ancestor of today's people carrier. Available in various versions, including panel van, pick up and minibus, Transporters were often converted into campervans for a newly motorised class of holidaymaker. This book looks at the development, production and use of the class first, and second, generation Transporter. With archive illustrations including many colour photographs from old brochures this book is also a great evocation of the 1950s and 60s.

The VW Camper Van Mike Harding 2013-05-23 It was invented immediately after the war, in the factory a far-sighted English military man had set up to turn the German economy from making machines of warfare to more pacific products. By the seventies that dream had been amply fulfilled, as the VW Campervan became the

conveyance of choice for West Coast hippies, Australian surf bums and Europeans taking the overland route to find enlightenment and good karma in India. It had also become – indeed, still is – the first choice for any couple, or family, seeking a cheap camping holiday with wheels attached. So never mind the oddly off-centre driving wheel, the vagaries of the aircooled rear engine – the VW Campervan had become more than a vehicle – it had truly become a way of life. Mike Harding's first ride in a Volkswagen Camper Van was back in 1961, when it was the carrying around the gear and bandmembers of his rock band the Manchester Rainmakers. Finally, in 2009, he could wait no longer, and bought his own, a 2001 Type 2 bay window Brazilian import Danbury conversion in hot orange and off white. Add in the endless curiosity of the author of eight
