people, objects, and ideas, and highlighting how social change and community formation is rooted in individual interactions. The volume engages with, and builds upon, recent paradigm shifts in the archaeology and history of the ancient Mediterranean which have centred the social and economic processes that produce communities. It utilises a series of case studies, encompassing the production, trade, and movement of objects and people, to explore new models for how production is organized and the recursive relationship between the cultural and the economic spheres of human society. The contributions address issues of agency and production at multiple scales of analysis, from larger theoretical discussions of trade and

identity across different regions, to context-specific explorations of production techniques and the distribution of material culture across the Italian peninsula. Production, Trade, and Connectivity in Pre-Roman Italy is intended for students and scholars interested in the archaeology and history of Pre-Roman and Early Republican Italy, but especially production, trade, community formation, and identity. Those interested in issues of cultural interaction and material change in the ancient Mediterranean world will find useful comparative examples and methodological approaches throughout.

the great importance of doing research on variation in closely related languages. This book centers on the study of the morphology and syntax of the two major Romance Languages spoken in Latin America from this perspective. The works presented here either compare Brazilian Portuguese with European Portuguese or compare Latin American Spanish and Peninsular Spanish, or simply compare Portuguese and its varieties with Spanish and its varieties. The chapters advance on a great variety of theoretical questions related to coordination, clitics , hyper-raising, infinitives, null objects, null subjects, hyper-raising, passives, quantifiers, pseudo-clefts, questions and distributed morphology. Finally, this book provides new empirical findings and enriches

the descriptions made about Portuguese and Spanish Spoken in the Americas by providing new generalizations, new data and new statistical evidence that help better understand the nature of such variation. The studies contained in this book show a vast array of new phenomena in these young varieties, offering empirical and theoretical windows to language variation and change.

time, it also questions the thesis that as societies become more modern, they also become less religious. The authors look beyond the rule of law orthodoxy in their consideration of the freedom of religion as a human right and place this discussion in a more plurality-sensitive context. The book sheds more light on the informal and/or customary mechanisms that explain the limited impact of law on individuals and groups, especially in non-Western societies. The focus is on discussing how religion and the exercise of religious rights may or may not empower individuals and social groups and improve access to human rights in general. This book is important reading for academics and practitioners of law and religion, religious rights, religious

diversity and cultural difference, as well as NGOs, policy makers, lawyers and advocates at multicultural jurisdictions. It offers a contemporary take on comparative legal studies, with a distinct focus on religion as an identity marker.

us a story -- a tale of people of all generations who leave home each year to return to a familiar place that is close to their hearts, where they pursue the very same holiday rituals year in and year out: Miss Rimini for one short summer season, a passionate kiss on the beach, nightly parties in the bars and restaurants, the joyful exuberance of youthful cliques seeking to experience everything life offers nowhere else in just a few short weeks and to forget what everyday life is. With his concentrated, atmospheric images, which bear the imprint of a fascinated, passionate observer, Claude Nori succeeds masterfully in capturing that mixture of Mediterranean lifestyle and carefree holiday spirit that awakens

memories and longings in us all.

topics among Italian philosophers gives rise to this volume of MEINONG STUDIES. As more than an introduction, Venanzio Raspa presents an enlightening historical presentation of Meinong's reception in Italy from his lifetime to the present day. Riccardo Martinelli offers a reconstruction of the Meinongian theory of musical objects of higher order. Francesca Modenato gives the outlines of Meinong's object theory as a theory of the pure object, separating it from ontology and associating it rather with gnoseology. From a less historical than systematic-analytic perspective, Andrea Bottani deals with incomplete objects, Mario Alai investigates the problem of propositions concerning non-existent objects, and Carola Barbero

proposes a realistic theory of the emotions aroused by reading literary texts. As themes related to Meinongian ones, Alberto Voltolini discusses the concept of existence as a property, Francesco Orilia validates an intuition of Meinong by adopting an approach called 'fact infinitism', and Guido Bonino deals with Gustav Bergmann's interpretation of Meinong's ontology. Das traditionelle und lebhaftere Interesse italienischer Philosophen an Meinongs Philosophie und damit zusammenhängenden Themen gibt Anlaß für diesen Band der MEINONG STUDIEN. Weit über die Anforderungen an eine Einleitung hinausgehend, präsentiert Venanzio Raspa eine erhellende Studie der Rezeption Meinongs in Italien von seinen Lebzeiten bis zum

heutigen Tag. Riccardo Martinelli rekonstruiert Meinongs Theorie musikalischer Objekte höherer Ordnung und Francesca Modenato umreißt Meinongs Objekttheorie (als Theorie reiner Objekte), welche sie eher der Gnoseologie denn der Ontologie zuordnet. Aus einer weniger historischen als systematisch-analytischen Perspektive befassen sich Andrea Bottani mit unvollständigen Objekten, Mario Alai mit der Frage nicht-existierende Objekte betreffender Aussagen, und Carola Barbero präsentiert eine realistische Theorie von Emotionen, die durch die Lektüre literarischer Texte erweckt werden. Als Meinong-bezogene Themen diskutiert Alberto Voltolini den Begriff der Existenz als Eigenschaft, Francesco

Orilia bestätigt in seinem 'Fakteninfinitemus' genannten Zugang eine Meinongsche Intuition, und Guido Bonino befaßt sich mit Gustav Bergmanns Interpretation der Meinongschen Ontologie.

Planning exploring methods and techniques for the design of GBI strategies. Nowadays, there is an advance in ES knowledge and a recognition of the benefits of GBI for the quality of human life and biodiversity conservation. The main challenge remains how this knowledge could be integrated into the planning process and how it could guide the

decision-making process towards sustainable development for contemporary cities. The book collects innovative Italian experiences providing important considerations for operationalizing the ES concept and highlighting different disciplinary attitudes and methodological approaches with the common goal to enhance human well-being.
