[Strategies for Accelerating Cleanup at Toxic Waste Sites](#) Scott Marshall Payne 2020-07-26
Accelerating Cleanup at Toxic Waste Sites: Fast-tracking Environmental Actions and Decision Making presents truly innovative advances in investigative and cleanup technologies, offering valuable solutions that streamline the data

collection process, speed up the time it takes to characterize a site, and expedite decision making. Using easy to understand graphic displays, tables, text summaries, and real world case studies, and by synthesizing technical and regulatory reference information crucial to the development of effective cleanup strategies, this book provides the framework for environmental professionals to develop project and program approaches that meet today's needs. An advanced text for those with at least basic understanding of environmental investigation, cleanup, regulations, decision making, and policy development, Accelerating Cleanup at Toxic Waste Sites addresses the "human" side of the environmental industry and why it is perhaps one of the most important considerations for successful accelerated cleanup. This book takes the next step by providing managers, project teams, and other professionals with approaches that bring techniques, regulations, strategies, and people together into one comprehensive

package that works.

The Wealth Choice Dennis Kimbro 2013-02-19
It's no secret that these hard times have been even harder for the Black community.
Approximately 35 percent of African Americans

had no measurable assets in 2009, and 24 percent of these same households had only a motor vehicle. Dennis Kimbro, observing how the weight of the continuing housing and credit crises disproportionately impacts the African-American community, takes a sharp look at a carefully cultivated group of individuals who've scaled the heights of success and how others can emulate them. Based on a seven year study of 1,000 of the wealthiest African Americans, The Wealth Choice offers a trove of sound and surprising advice about climbing the economic ladder, even when the odds seem stacked against you. Readers will learn about how business leaders, entrepreneurs, and celebrities like Bob Johnson, Spike Lee, L. A. Reid, Herman Cain, T. D. Jakes and Tyrese Gibson found their paths to wealth; what they did or didn't learn about money early on; what they had to sacrifice to get to the top; and the role of discipline in managing their success. Through these stories, which include men and women at every stage of

life and in every industry, Dennis Kimbro shows readers how to:

- Develop a wealth-generating mindset and habits
- Commit to lifelong learning
- Craft goals that match your passion
- Make short-term sacrifices for long-term gain
- Take calculated risks when opportunity presents itself
