Putin's United Russia Party S. P. Roberts 2012-03-12
From its inception in 2001, the United Russia Party has rapidly developed into a hugely successful, organisationally-complex political party and key component of power. This book provides a much needed analysis on United Russia by exploring the role of the party in the Russian political system, from 2000 to 2010. It explores the party empirically, as an impressive organisation in its own right, but also theoretically, as an independent or explanatory variable able to illumine the larger development of dominant-power politics in Russia in the same period. The book creates a model to understand the role of political parties in electorally-based political systems and shows how United Russia conforms to this model, and importantly, how the party also has unique features that affect its place in the political system. The book goes on to argue that United Russia represents a 'virtual' party hegemony, an outcome of political changes occurring elsewhere, and so a reversal of the typical

relationship between parties and power found in comparative literature. This has potentially far reaching implications for our understanding of party dominance in the twenty-first century and also the sources of regime stability and instability.

Globalization and Trade Integration in Developing Countries Özer, Ahu Co?kun 2018-05-04 In a rapidly globalizing world, commercial relations and regional trade integrations between countries have improved. Analyzing trade relations both inside and outside countries allows for economic improvement. Globalization and Trade Integration in Developing Countries provides emerging research on the difficulties and challenges developing countries face in world trade as well as their performance. While highlighting topics such as economic growth, foreign trade policy, and trade competitiveness, this publication explores the trade integrations and commercial trends in advancing countries. This book is a vital resource for policy makers, government agencies, businesses, academicians, researchers, and students seeking current research on

the advantages and techniques of improved international markets and trade.

Animation Behind the Iron Curtain Eleanor Cowen

2020-09-22 *Animation Behind the Iron Curtain* is a journey of discovery into the world of Soviet era animation from Eastern Bloc countries. From Jerzy Kucia's brutally exquisite *Reflections in Poland* to the sci-fi adventure of *Ott in Space* by Estonian puppet master Elbert Tuganov to the endearing *Gopo's little man* by Ion Popescu-Gopo in Romania, this excursion into Soviet era animation brings to light magnificent art, ruminations on the human condition, and celebrations of innocence and joy. As art reveals the spirit of the times, animation art of Eastern Europe during the Cold War, funded by the Soviet states, allowed artists to create works illuminating to their experiences, hopes, and fears. The political ideology of the time ironically supported these artists while simultaneously suppressing more direct critiques of Soviet life. Politics shaped the world of these artists who then fashioned their realities into amazing works of animation. Their art is integral to the circumstances in which they lived, which is why this book combines the unlikely combination of world politics and animated cartoons. The phenomenal animated films shared in this book offer a glimpse into the culture and hearts of Soviet citizens who grew up with characters as familiar and beloved to them as Mickey Mouse and Bugs Bunny are to Americans. This book lays out the basic political dynamics of the Cold War and how those political tensions affected the animation industry in both the US and in the Eastern Bloc. And, for animation novices and enthusiasts alike, *Animation Behind the Iron Curtain* also offers breakout sections to explain many of the techniques and aesthetic

considerations that go into this fascinating art form. This book is a must read for anyone interested in the Cold War era and really cool animated films!

Minerals Yearbook Area Reports International 2012-12-20

The *Minerals Yearbook* is an annual publication that reviews the mineral and material industries of the United States and foreign countries. The Yearbook contains statistical data on materials and minerals and includes information on economic and technical trends and development. The *Minerals Yearbook* includes chapters on approximately 90 commodities and over 175 countries. This volume of the *Minerals Yearbook* provides an annual review of mineral production and trade and of mineral-related government and industry developments in more than 175 foreign countries. Each report includes sections on government policies and programs, environmental issues, trade and production data, industry structure and ownership, commodity sector developments, infrastructure, and a summary outlook. Arms Control and Europe Polina Sinovets 2022-08-08 This book examines the recent changes in strategic stability, caused by the collapse of the international security architecture. Against the background of Russia's invasion of Ukraine, international experts discuss topics and critical issues such as the revanchist strategy of Russia and the readiness of the United States (US) and Europe to give an adequate response; the influence of new technologies in the future of nuclear deterrence; and the crumbling of the arms control and nonproliferation system under the new challenges. The book explains how the combination of these factors lead to a crucial change of strategic stability and the international security landscape, the first such change

since the end of the Cold War. Divided into three parts, the book presents timely analyses on (1) US, Russia: New Challenges and Strategic Stability in Europe; (2) Extended Deterrence and Arms Control in Europe; and (3) Regional Dimensions of Strategic Stability in Europe. It further offers perspectives from and case studies on different countries, such as Ukraine, France, Germany, the United Kingdom, the USA, Turkey, Poland, and Romania. This book is a must-read for scholars for international relations, as well as policy-makers interested in a better understanding of the changing international security architecture, Russia's strategy, arms control, nonproliferation, and the future of nuclear deterrence.

Structural Quarterly Projection Model for Belarus Karel Musil 2018-12-07 Belarusian authorities contemplate transiting to inflation targeting. The paper suggests a small structural model at the core of the forecasting and policy analysis system. A well-researched canonical structure of Berg, A., Karam, P. and D. Laxton (2006) is extended to capture specifics of Belarusian economy and macroeconomic policy. The modified model's policy block reflects a monetary targeting regime and allows for transition from it to an interest-rate-based framework. Adding wages, directed lending and dollarization allow for studying implications of activist wage policy, state program lending, and dollarization for macroeconomic stability and the strength of the policy transmission mechanism.

The Russian Dilemma Gordon M. Hahn 2021-11-17 From the end of the Mongol Empire to today, Russian history is a tale of cultural, political, economic and military interaction with Western powers. The depth of this relationship has created a geopolitical dilemma: Russia

has persistently been both attracted to and at odds with Western ideas and technological development, which have tended to threaten Russia's sense of identity and create destabilizing divisions within society. Simultaneously, deepening involvement in Western international affairs brought meddling in Russian domestic politics and military invasion. This book examines how the centuries-old Western threat has shaped Russia's political and strategic structures, creating a culture of security rooted in vigilance against Western influence and interference.

Biological Systems, Biodiversity, and Stability of Plant Communities Larissa I. Weisfeld 2015-05-08 This book discusses theoretical approaches to the taxonomy of biological systems and theory and mathematical approaches to the problem of plant diversity, cultivation, and the environment. Particular attention is given to theoretical and practical problems of soil and the environmental sustainability of phytocoenosis, with the goal to enhance the productivity of agricultural crops: cereals, legumes, vegetables, and fruit. Providing valuable information on the distribution of chemical elements in the soil-plant system and on the migration of chemical elements in the food chain, this book looks at the composition of the soil and the distribution of elements in the soil-plant system that are manifested as adaptations of plant organism to environmental conditions. With chapters written by acknowledged scientists in the field of genetics, plant selection, ecology, and agro-economy, the book attempts, in many cases, to find consensus between the need to address ways to decrease the excess load on the environment and the need to provide adequately for the human population in agro-developed

countries. This book also presents precision farming techniques, including the introduction of differentiated agrochemicals and considering variability of soil fertility and crop conditions. An important element for the conservation and adaptation of plant organism to environmental conditions is the use of physiologically active compounds.

Pandemic and Crisis Discourse Andreas Musolff 2022-02-10

The COVID-19 pandemic has led to a host of critical reflections about discourse practises dealing with public health issues. Situating crisis communication at the centre of societal and political debates about responses to the pandemic, this volume analyses the discursive strategies used in a variety of settings. Exploring how crisis discourse has become a part of managing the public health crisis itself, this book focuses on the communicative tasks and challenges for both speakers and their public audiences in seven areas: - establishment of discursive and political authority - official governmental and expert communication to the public - public understanding of government communication - legitimation of public health management as a 'war' - judging and blaming a collective other - cross-national comparison and rivalry - empathy and encouragement Covering global discourses from Asia, Europe, the Middle East, North and South America, and New Zealand, chapters use corpus-based data to cast light on these issues from a variety of languages. With crisis discourse already the object of fierce national and international debates about the appropriateness of specific communicative styles, information management and 'verbal hygiene', **Pandemic and Crisis Discourse** offers an authoritative intervention from language experts.

Disinformation, Narratives and Memory Politics in Russia and Belarus Agnieszka Legucka 2022-06-24 This book examines the ways in which Russia and Belarus use disinformation, "weaponised" historical narratives, and the politics of memory for domestic and foreign policy purposes, utilising these factors to justify aggressive foreign policy in defensive terms and, domestically, for legitimating local ruling elites, consolidating the states' propaganda machines, and mobilising both societies around national power centres. Besides analysing Russian and Belarusian disinformation, geopolitical narratives, and policies, the book also assesses the effectiveness of these measures and discusses how the West can counteract the geopolitical narratives disseminated by Russia and Belarus that attempt to undermine Western democracies and weaken the resilience of its societies.

Not by Bread Alone Robert Nalbandov 2016 Since its independence in 1991, Russia has struggled with the growing pains of defining its role in international

politics. After Vladimir Putin ascended to power in 2000, the country undertook grandiose foreign policy projects in an attempt to delineate its place among the world's superpowers. With this in mind, Robert Nalbandov examines the milestones of Russia's international relations since the turn of the twenty-first century. He focuses on the specific goals, engagement practices, and tools used by Putin's administration to promote Russia's vital national and strategic interests in specific geographic locations. His findings illuminate Putin's foreign policy objective of reinstating Russian global strategic dominance. Nalbandov argues that identity-based politics have dominated Putin's tenure and that Russia's east/west split is reflected in Asian-European politics. Nalbandov's analysis shows that unchecked domestic power, an almost exclusive application of hard power, and determined ambition for unabridged global influence and a defined place as a world superpower are the keys to Putin's Russia.

Identity and Nation Building in Everyday Post-Socialist

Life Abel Polese 2017-07-31 This book explores the function of the "everyday" in the formation, consolidation and performance of national, sub-national and local identities in the former socialist region. Based on extensive original research including fieldwork, the book demonstrates how the study of everyday and mundane practices is a meaningful and useful way of understanding the socio-political processes of identity formation both at the top and bottom level of a state. The book covers a wide range of countries including the Baltic States, Ukraine, Russia, the Caucasus and Central Asia, and considers "everyday" banal practices, including those related to consumption,

kinship, embodiment, mobility, music, and the use of objects and artifacts. Overall, the book draws on, and contributes to, theory; and shows how the process of nation-building is not just undertaken by formal actors, such as the state, its institutions and political elites.

Nations in Transit 2007 Jeannette Goehring 2007 Covering 29 countries and administrative areas, *Nations in Transit 2007* provides comparative ratings and in-depth analysis of electoral processes, civil society, independent media, national democratic governance, local democratic governance, judicial framework & independence, and corruption.

Comprehensive analysis of the disaster risk reduction system for the agricultural sector in Belarus Food and Agriculture Organization of the United Nations 2022-04-11 This report aims to highlight the current strengths of the institutional DRR system for agriculture in Belarus as well as indicate existing gaps and capacity needs to further enhance it. A comprehensive assessment is conducted, which includes a general overview of the country's agricultural sector and outlines the most frequent natural hazards that are impacting the sector. It is followed by an analysis of the existing legal, policy and institutional structure and discusses various components of the system, including e.g. the functioning of early warning systems, assessments of disaster risks, post-disaster needs assessments, including damages and losses assessments and the availability of agricultural insurance for farmers. It concludes by providing recommendations for capacity building interventions to strengthen the current system to reduce the adverse impacts of natural hazards, in particular, floods, landslides and droughts,

and climate change on agriculture in Belarus.

The "Roads" and "Belts" of Eurasia Alexander Lukin

2020-03-02 This book addresses the challenges and opportunities of contemporary and future development of Eurasia. The main theme of the first part of the book is examining the reaction evoked in different countries by the Chinese "Belt and Road Initiative." The second part analyses other national and international integration and infrastructure projects in Eurasia. This unique publication brings together in one volume works by leading researchers from different countries, all united by their common interest in the political and economic processes unfolding in the Eurasian continent. By offering various points of view from experts from all over the world, this book provides a multi-dimensional analysis of the Eurasian future and will be of value to a wide range of readers, including scholars, publicists, the international business community and decision-makers.

Russian Energy Strategy in the European Union, the Former Soviet Union Region, and China Stylianos A.

Sotiriou 2014-12-11 This book examines three bipolar relationships that have emerged as a result of the Eurasian energy triangle—Russia-Former Soviet Union region, Russia-EU, and Russia-China—and the ways in which they, along with Putin's foreign energy policy, relate to the debate between neorealism and neoliberal institutionalism.

Russia's Role in the Contemporary International Agri-

Food Trade System Stephen K. Wegren 2021-11-11 This Open

Access book analyses the emergence of Russia as a global food power and what it means for global food trade.

Russia's strategy for food production and trade has changed significantly since the end of the Soviet period, and this is the first book to take account of Russia's rise as a food power and the global implications of that rise. It includes food trade policy and practice, and developments in regional food trade. This book will be of interest to academics and practitioners in agricultural economics, international trade, and international food trade.

Policy Capacity and Governance Xun Wu 2017-09-29 This book provides unique insights into the role of policy capacity in policymaking and policy change, as it is being uncovered at the research frontier in contemporary policy studies. The book is structured into a series of sections on policy capacity in theory and practice, each focusing on a specific aspect of policy capacity and its influence on policy formulation, decision-making, implementation and evaluation. In addition to making a significant contribution to the body of literature on the theoretical approaches to researching the role of capacity in policymaking, it also provides practical examples of the application of these approaches through a variety of national and sectoral case studies. Including contributions from authors working in a wide variety of disciplines, the book demonstrates, across the various topics investigated, many commonalities and consistencies in relation to the study of policy capacity and policy-making. This work has interdisciplinary appeal and will engage scholars in fields ranging from geography to communications, health, social work and political science, amongst others with an interest in public policy.

Chemical and Biochemical Physics David Schiraldi 2016-06-22 Written by highly regarded experts in the field, this book covers many of the major themes of chemical and biochemical physics, addressing important issues, from concept to technology to implementation. It provides new research and updates on a variety of issues in physical chemistry and biochemical physics. Many chapters include case studies and supporting technologies and explain the conceptual thinking behind current uses and potential uses not yet implemented. By providing an applied and modern approach, this volume presents a wide-ranging view of current developments in applied methodologies in chemical and biochemical physics research.

Belarus Andrew Wilson 2021-03-09 A comprehensive and revelatory history of modern Belarus - from independence to 2020's contested election In 2020 Belarus made headlines around the world when protests erupted in the aftermath of a fraught presidential election. Andrew Wilson explores both Belarus's complicated road to nationhood and its politics and economics since it gained independence in 1991. Two new chapters reveal the extent of Aliaksandr Lukashenka's grip on power, the growth of the opposition movement and the violent crackdown that followed the vote. Wilson also examines the prospects for Europe as a whole of either Lukashenka's downfall or his survival with Russian support. "Andrew Wilson has done all students of European politics a great service by making the history of Belarus comprehensible and by showing how the future of Belarus might be different than its present."—Timothy Snyder, author of *Bloodlands: Europe Between Hitler and Stalin*

Identities and Foreign Policies in Russia, Ukraine and Belarus Stephen White 2014-10-22 This book maps changing definitions of statehood in Russia, Ukraine and Belarus as a result of their exclusion from an expanding Europe. The authors examine the perceptions of the place of each state in the international political system and its foreign policy choices, and draw comparisons across the region.

Hundred Years of the Russian Revolution Anuradha M. Chenoy 2021-04-07 The book reflects upon the Russian Revolution of 1917 and the ensuing developments in Russia, the rest of the former Soviet Union, Central and Eastern Europe and elsewhere in the world. It discusses the impact of the legacies of the Russian Revolution on political systems, ideologies, economic and social structures and culture. The book answers some pertinent questions: To what extent are these legacies relevant today for the contextualisation of memory politics, social institutions, and international relations? How does an analysis of 1917 and its legacies contribute to the comparative study of revolutions and social change?

Chemistry and Technology of Plant Substances Alexander V. Kutchin 2017-07-28 Chemistry and Technology of Plant Substances: Chemical and Biochemical Aspects demonstrates the progress and promise of developing new chemical substances from renewable sources of chemical raw materials. The volume brings together new achievements in the field of research and processing of plant raw materials and the synthesis of natural compounds for the production of biologically active substances and drugs. The volume looks closely at the rational use of renewable raw materials, which is the source of new compounds and intermediates for the chemical industry. It covers a wide range of problems associated with the use of the components of plants to produce new substances with a wide variety of purposes. According to the latest estimates, plants form about a million chemical substances. In some cases, plant products have pharmacological or biological activity that can be of therapeutic benefit in treating diseases. In addition, due to the structural diversity of plant material, chemical synthesis is easily reachable. Synthetic analogs of natural products with improved potency and safety can be prepared by chemical synthesis. Such synthetic analogs are safer for humans. Plant materials are often used as starting points for drug discovery. Chemistry and Technology of Plant Substances: Chemical and Biochemical Aspects presents the theoretical trends and recent practical achievements on complex processing of plant-based raw materials. Low molecular weight components, isolated from plant material, are widely used in fine organic synthesis. High molecular weight polysaccharides of conifers and

other greens, such as pectin and hemicellulose, are the basis for the creation of anticoagulants and other drugs. The range of research papers presented in the book is quite wide: from fundamental and applied problems of wood chemistry and organic synthesis to biological activity of natural compounds. The book provides valuable information for those skilled in organic chemistry, chemical engineers, researchers and scientists as well as for faculty and upper-level students. This volume, *Chemistry and Technology of Plant Substances: Chemical and Biochemical Aspects*, was created on the initiative of Emanuel Institute of Biochemical Physics of the Russian Academy of Sciences (Moscow) and the Institute of Chemistry of Komi Scientific Center of Ural Branch of the Russian Academy of Sciences (Syktyvkar).

Synthesis, Properties and Applications of

Ultrananocrystalline Diamond Dieter M. Gruen 2005-04-13

Ultrananocrystalline diamond (UNCD) is one of the important members of the triad of nanostructured carbons, which includes fullerenes and nanotubes. UNCD with characteristic sizes of primary particles less than 10 nm occurs in two forms: as a dispersed powder made by detonation techniques and as a chemical vapor deposited film. This book for the first time combines results of research pursued by the two communities of scientists, which up to now, have been working rather independently and largely unaware of the vast synergistic relationships existing between them. It is particularly noteworthy that much of the Russian work on disperse UNCD is available here in English for the first time. The outstanding experts in the two fields are represented in this volume discussing the basic

theoretical concepts underlying the synthesis and characterization of these nanomaterials and describing progress that has been made in several areas of applications such as nanocomposites, selective adsorbents, colloidal suspensions, microabrasives, lubricants, quantum dots, cold-cathodes for UNCD particles and MEMS, biosensors, electrochemical, and nerve prostheses, high temperature, highly rectifying diodes, FET's, thermoelectrics for UNCD films. This Proceedings volume will be of interest to a wide audience of scientists and engineers and serve as an introduction to an important and rapidly evolving field of nanoscience and nanomaterials; as a text for a special topics graduate course; or as a starting point for those interested in the development of new approaches to problems that have hitherto defied solution for lack of suitable materials.

Believing in Russia - Religious Policy after Communism

Geraldine Fagan 2012-10-23 This book presents a comprehensive overview of religious policy in Russia since the end of the communist regime, exposing many of the ambiguities and uncertainties about the position of religion in Russian life. It reveals how religious freedom in Russia has, contrary to the widely held view, a long tradition, and how the leading religious institutions in Russia today, including especially the Russian Orthodox Church but also Muslim, Jewish and Buddhist establishments, owe a great deal of their special positions to the relationship they had with the former Soviet regime. It examines the resurgence of religious freedom in the years immediately after the end of the Soviet Union, showing how this was subsequently curtailed, but only partially, by the important law of 1997. It discusses the pursuit of privilege for the

Russian Orthodox Church and other 'traditional' beliefs under presidents Putin and Medvedev, and assesses how far Russian Orthodox Christianity is related to Russian national culture, demonstrating the unresolved nature of the key question, 'Is Russia to be an Orthodox country with religious minorities or a multi-confessional state?' It concludes that Russian society's continuing failure to reach a consensus on the role of religion in public life is destabilising the nation.

Creating a Eurasian Union Y. Vymyatnina 2014-07-02

Creating a Eurasian Union offers a detailed analysis of the economies of the Customs Union of Russia, Belarus, and Kazakhstan and the proposed Eurasian Union. The authors employ econometric analysis of business cycles and cointegration analysis to prove the fragility of the union's potential economic success. By providing a brief description of the economic integration of the former Soviet republics, this pioneering work analyses the on-

going trial and error processes of market integration led by Russia. Vymyatnina and Antonova's distinctive argument is the first consistent analysis of the emerging Eurasian Union. They incorporate both a non-technical summary of the integration process and previous research and analytical comments, as well as a thorough empirical analysis of the real data on the economic development of the participating countries, to caution that the speed of integration might undermine the feasibility of the Eurasian Union.

Russian Foreign Policy toward Missile Defense Bilyana Lilly 2014-08-21 This book offers in-depth analysis of the reasons behind Russia's policy toward the construction of a U.S ballistic missile defense system in Europe. It examines Russia's policymaking dynamics and argues that, contrary to Moscow's official claims, Russia's objections are based on a combination of security concerns and political calculations.
