India's Great Power Politics Jo Inge Bekkevold 2020-12-23 This book examines India's foreign and defence policy changes in response to China's growing economic and military power

and increased footprint across the Indo-Pacific. It further explores India's role in the rivalry between China and the United States. The book looks at the strategic importance of the Indian Ocean Region in the Indo-

Pacific geopolitical landscape and how India is managing China's rise by combining economic cooperation with a wide set of balancing strategies. The authors in this book critically analyse the various tools of Indian foreign policy, including defence posture, security alignments, and soft power diplomacy, among others, and discuss the future trajectory of India's foreign policy and the factors which will determine the balance of power in the region and the potential risks involved. The book provides detailed insights into the multifaceted and complex relationship between India and China and will be of great interest to researchers and students of international relations, Asian studies, political science, and economics. It will also be useful for policymakers, journalists, and think tanks interested in the India-China relationship.

Essays on Iran and Israel: An Indian Perspective 2014-03-15 This book, containing essays on themes relating to India's relations with Iran and Israel, deals with issues that have been intensely debated in the country for some time now. India's robust ties with both Iran and Israel - bitter adversaries for more than

three decades - have intrigued West Asia watchers. The essays herein highlight the parallel nature of India's engagements with the two countries and attempt to understand the critical concept of strategic autonomy that defines India's foreign policy postures on contentious issues. The first five essays touch on the central drivers of India's Iran policy and discuss the limits on New Delhi's relations with the Islamic Republic. The last three essays dealing with Israel highlight the significance of India's intervention on questions relating to Israel as well as Israel's inspirational connection with India. With its unique treatment, lucid analysis and unusual organisation, this factually informed and policy oriented collection of essays on India, Iran and Israel will be an extremely useful resource for scholars, students, policymakers and diplomats alike. It will also

interest business community involved with the West Asian region as well as any intelligent layperson looking for facts and figures on subjects discussed in the book.

Individual Behaviors and Technologies
for Financial Innovations Wesley
Mendes-Da-Silva 2018-07-26 This book
offers comprehensive examination of
research on the relevance of
individual behavior and technology to
financial innovations. The chapters
cover current topics in finance
including integrated reporting,
people finance, crowdfunding, and
corporate networks. It provides
readers with an organized starting
point to explore individual behaviors
and new technologies used in
financial innovations. The explicit
and growing speed of the spread of
new technologies has hastened the
emergence of innovation in the field

of finance. Topics like the Internet
of Things, semantic computing and big
data finance are motivating the
construction of financial tools that
translate into new financial
mechanisms. This book strives help
readers better understand the dynamic
of the changes in financial systems
and the proliferation of financial
products. Individual Behaviors and
Technologies for Financial
Innovations is organized in 16
chapters, organized in three parts.
Part I has eight chapters that review
the research on gender differences in
attitudes about risk and propensity
to purchase automobile insurance,
financial literacy models for college
students, wellness and attitude of
university students in the use of
credit cards, impact of programs
income distribution and propensity to
remain in employment, financial
literacy and propensity to resort to
informal financing channels, risk
behavior in the use of credit cards

by students. Part II reviews the research on financing for startups and SMEs, exploring funding through crowdfunding platform, operating credit unions, and using networks of friends to finance small businesses outside the domestic market. The four chapters of Part III describe contexts of financial innovation in listed companies, including society's demands on their behavior - we discuss motivations for companies to participate in corporate sustainability indexes, corporate performance through their profile of socially responsible investments, influence of networks of social relations in the formation of boards, and management of companies, and also the precariousness of financial decisions in large companies, as well as the role of the internet in corporate communication with the market.

The Religious Factor in Russia's Foreign Policy Alicja Curanović

2012-03-15 This book examines how religion interacts with Russian foreign policy, arguing that religion is an important and neglected factor in shaping Russia's outlook towards international relations. It surveys the importance of religion for social life in Russia, both historically and at present, and considers a wide range of Russian attitudes which are affected by religion - such as Russian nationalism, notions of Slavic solidarity, the divine mission of Russian Orthodox civilisation, Russian imperialism, Russia's special approach towards Islam. The book discusses how religious organizations, especially the Russian

Orthodox Church, operate in international relations, pursuing their own interests and those of the Russian state; explores how religious ideas and culture linked to religion impinge on Russian attitudes and identity, and thereby affect policy; and demonstrates how policy influenced by religion impacts on Russian foreign policy in practice in a wide range of examples, including Russia's relations with other orthodox countries, non-orthodox Western countries, Muslim countries, Israel and the Vatican.

India-Russia Post Cold War Relations

Chandra Rekha 2017-04-28 Post Cold

War international relations have undeniably been a litmus test for the bilateral relations between India and Russia. With the emergence of a new international system, the foreign policies of both countries vacillated to explore new avenues of partnerships with other international players, an opportunity that otherwise proved effective to a large extent. National priorities and the geo-political architecture remodelled by the US, thus, compelled New Delhi and Moscow to pursue a foreign policy that moved away from serving the interests of each other. While defining the trends in the bilateral relations between the two countries, the strategic community has questioned whether the relationship can remain as special and strategic as it had been in the past. Are both countries still as relevant to one another as they once were? As the constant debate revolves around these questions, the two entities have,

however, indicated a certain level of distinguishing characteristics in order to address the complexities and challenges in the partnership and have acknowledged that their relationship is not only special but also indispensable. What has also continued to remain undamaged and an integral part of the bilateral relations is mutual trust, understanding and concern, thus, resulting in maturity and pragmatism, irrespective of the uncertainties that the two countries face. It is in this context, that the new stage in the bilateral relations between the two countries requires a thorough assessment. It stands to reason that with the developments that are taking place in the current international milieu, there is a need for India and Russia to reemphasise their strong strategic partnership, goodwill and diplomatic trust that have stood the test of time. This book undertakes a serious assessment of the strategic

partnership in the contemporary international set up. The seven chapters of the book attempt to address the myriad challenges through detailed analyses and evaluation of the partnership between India and Russia in various spheres, including the political, defence, economic, nuclear, energy, science and technology, security, and strategic engagement.

The Global Digital Economy: A Comparative Policy Analysis

Carin Coates 2015-01-08 This book explores the intersection of public policy and the fast changing digital media economy. Over the last 20 years, digital technologies and digital content have revolutionized many aspects of social, economic and political life around the world. Governments, locked into the policies and programs of the traditional economy, are struggling to respond to this dynamic and commercially unique global ecosystem. This study examines

Moscow still sees Central Asia through the lens of the Soviet Union, and it struggles to redefine Russian relations with the region. In *The Fight for Influence*, Alexey Malashenko offers a comprehensive analysis of Russian policies and prospects in Central Asia. It is clear that Russian policy in the formerly Soviet-controlled region is entering uncharted territory. But does Moscow understand the fundamental shifts under way? Malashenko argues that it is time for Russia to rethink its approach to Central Asia. Contents 1. Wasted Opportunities 2. Regional Instruments of Influence 3. Russia and Islam in Central Asia: Problems of Migration 4. Kazakhstan and Its Neighborhood 5. Kyrgyzstan—The Exception 6. Tajikistan: Authoritarian, Fragile, and Facing Difficult Challenges 7. **Psychological Perspectives on
Childcare in Indian Indigenous Health
Systems** Malavika Kapur 2015-06-22

This book examines childcare in ancient Indian health systems from the perspective of developmental psychology. The author extensively studies ancient texts and charts from Ayurveda, Unani, Siddha and Tibetan medicines and analyses how gleanings from these systems can be useful in creating preferred practices for modern childcare systems. Though the four systems originated in different geographical regions, they share many common core constructs of a holistic approach consisting of mind-body unity. The core of psychological healing in these systems rests on bringing about harmony and balance of disturbed functions through diet, daily regimen and drugs. However, despite commonalities, understanding of childcare in the four systems

varies a great deal. The differences seem to be rooted in local sociocultural, religious and folk healing practices. Remarkably, in all of them, prescriptions of drugs and behaviour are psychologically grounded and uncannily modern from the perspective of developmental psychology. The book raises the following questions as important for further research: whether holistic approaches be adopted for the empirical study of indigenous health systems, where their strength lies; whether personality frameworks identified in the four systems can be incorporated into contemporary medical practice to its advantage; whether preferred childcare practices among the four systems can be studied empirically in current paediatric, psychological and parenting research; and whether faith, if it is of importance to the patient, can be incorporated as an element into contemporary medical practice.

History & Mathematics Grinin, Leonid 2014-10-15 The present yearbook (which is the fourth in the series) is subtitled Trends & Cycles. It is devoted to cyclical and trend dynamics in society and nature; special attention is paid to economic and demographic aspects, in particular to the mathematical modeling of the Malthusian and post-Malthusian traps' dynamics. An increasingly important role is played by new directions in historical research that study long-term dynamic processes and quantitative changes. This kind of history can hardly develop without the application of mathematical methods. There is a tendency to study history as a system of various processes, within which

one can detect waves and cycles of different lengths - from a few years to several centuries, or even millennia. The contributions to this yearbook present a qualitative and quantitative analysis of global historical, political, economic and demographic processes, as well as their mathematical models. This issue of the yearbook consists of three main sections: (I) Long-Term Trends in Nature and Society; (II) Cyclical Processes in Pre-industrial Societies; (III) Contemporary History and Processes. We hope that this issue of the yearbook will be interesting and useful both for historians and mathematicians, as well as for all those dealing with various social and natural sciences.

New Approaches to Slavic Verbs of

Motion Viktoria Hasko 2010 This volume unifies a wide breadth of interdisciplinary studies examining the expression of motion in Slavic languages. The contributors to the volume have joined in the discussion of Slavic motion talk from diachronic, typological, comparative, cognitive, and acquisitional perspectives with a particular focus on verbs of motion, the nuclei of the lexicalization patterns for encoding motion. Motion verbs are notorious among Slavic linguists for their baffling idiosyncratic behavior in their lexical, semantic, syntactical, and aspectual characteristics. The collaborative effort of this volume

is aimed both at highlighting and accounting for the unique properties of Slavic verbs of motion and at situating Slavic languages within the larger framework of typological research investigating cross-linguistic encoding of the motion domain. Due to the multiplicity of approaches to the linguistic analysis the collection offers, it will suitably complement courses and programs of study focusing on Slavic linguistics as well as typology, diachronic and comparative linguistics, semantics, and second language acquisition. "This important book is a model of in-depth exploration that is much needed: intra-typological, diachronic, and synchronic exploration of contrasting ways of encoding a particular semantic domain û in this case the domain of motion events. The various Slavic languages present contrasting but related solutions to the intersection of motion and aspect.

Russian Foreign Policy Nikolas K. Gvosdev 2013-08-22 In a truly contemporary analysis of Moscow's relations with its neighbors and other strategic international actors, Nikolas K. Gvosdev and Christopher Marsh use a comprehensive vectors approach, dividing the world into eight geographic zones. Each vector chapter looks at the dynamics of key bilateral relationships while highlighting major topical issues—oil and energy, defense policy, economic policy, the role of international institutions, and the impact of major interest groups or influencers—demonstrating that Russia formulates multiple, sometimes contrasting, foreign policies.
