2021-11-30 With forty-
two extensively
annotated maps, this
atlas offers novel
insights into the
history and mechanics of
how Central Europe's
languages have been
made, unmade, and
deployed for political
action. The innovative
combination of
linguistics, history,
and cartography makes a
wealth of hard-to-reach
knowledge readily
available to both
specialist and general
readers. It combines
information on
languages, dialects,
alphabets, religions,
mass violence, or
migrations over an
extended period of time.
The story first focuses
on Central Europe's
dialect continua, the
emergence of states, and
the spread of writing
technology from the
tenth century onward.
Most maps concentrate on

the last two centuries.
The main storyline opens
with the emergence of
the Western European
concept of the nation,
in accord with which the
ethnolinguistic nation-
states of Italy and
Germany were founded. In
the Central European
view, a "proper" nation
is none other than the
speech community of a
single language. The
Atlas aspires to help
users make the
intellectual leap of
perceiving languages as
products of human
history and part of
culture. Like states,
nations, universities,
towns, associations,
art, beauty, religions,
injustice, or
atheism—languages are
artefacts invented and
shaped by individuals
and their groups.

2019-03-12 This volume gathers the latest advances, innovations, and applications in the field of wind engineering, as presented by leading international researchers and engineers at the XV Conference of the Italian Association for Wind Engineering (IN-VENTO 2018), held in Naples, Italy on September 9-12, 2018. It covers highly diverse topics, including aeroelasticity, bluff-body aerodynamics, boundary layer wind tunnel testing, computational wind engineering, structural dynamics and reliability, wind-structure interaction, flow-induced vibrations, wind modeling and forecast, wind disaster mitigation, and wind climate assessment. The contributions, which were selected by means

of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists. The Food of Italy

Claudia Roden 2014-03-20

Like Elizabeth David, Claudia Roden can write about anything. Whether it's Middle Eastern, Spanish or Italian food, she is the cook to turn to. She is world renowned for her classic books like Arabesque and the Book of Jewish Food. These draw on her Egyptian Jewish roots so it's no wonder Middle Eastern chefs like Ottolenghi are among her biggest fans. But it is interesting to see that Russell Norman of Polpo cites Food of Italy as his favourite cookbook. Polpo is very cool, very modern, very Italian and yet still Claudia Roden's classic is his go-to cookbook. Food of Italy was first published 25 years ago next year. But the recipes are so fresh yet timeless they are hard

to date. For this edition she has updated over 30% of the recipes to fit modern tastes with new inclusions like farro salad and burrata. The book is structured by region. So you get the glorious tomato and aubergine dishes of Sicily; the classically Roman dishes like salty meat and fried vegetables, and rich Tuscan stews and soups, and so on. With over 300 short recipes it is an incredible repertoire, and it is completely approachable for home cooks. This fully illustrated edition includes recipe photos as well as local Italy scenes. This is the first time it has had photos since it was originally published.

Gender from Latin to Romance Michele

the present from all the Romance languages and dialects, discussing examples from Romanian to Portuguese and crucially also focusing on less widely-studied varieties such as Sursilvan, Neapolitan, and Asturian. The investigation first reveals that several varieties display more complex systems than the binary masculine/feminine contrast familiar from modern French or Italian. Moreover, it emerges that traditional accounts, whereby neuter gender was lost in the spoken Latin of the late Empire, cannot be correct: instead, the neuter gender underwent a range of different transformations from Late Latin onwards, which are responsible for the different systems that can be observed today across the Romance languages.

The volume provides a detailed description of many of these systems, which in turns reveals a wealth of fascinating data, such as varieties where 'husbands' are feminine and others where 'wives' are masculine; dialects in which nouns overtly mark gender, but only in certain syntactic contexts; and one Romance variety (Asturian) in which it appears that grammatical gender has split into two concurrent systems. The volume will appeal to linguists from a range of backgrounds, including Romance linguistics, historical linguistics, typology, and morphosyntax, and is also of relevance to those working in sociology, gender studies, and psychology.

Advances in Italian Mechanism Science

Giuseppe Carbone

2018-10-29 This book

constitutes the Proceedings of the Second International Conference of IFToMM ITALY, held in Cassino, Italy, in 2018. The main topics of the workshop include: Computational Kinematics, Dynamics of Machinery, Gearing and Transmissions, Multibody Dynamics, Mechatronics, Mechanism Design, Tribology, Vibration, Industrial and non-Industrial Applications. *Corporate Social Responsibility and Employer Attractiveness* Silke Bustamante 2022-01-08 This book investigates the preferences of young job seekers for different aspects of corporate social responsibility (CSR) in comparison to other non-CSR related employer attributes. It takes into account the potential influence of cultural and socio-economic variables and provides a

differentiated global perspective. In its first part the book gives an overview about the impact of CSR on employer attractiveness and explains the factors that potentially influence CSR preferences of young job seekers all over the world. In a second part the research design is outlined and employer related preferences of 4783 graduates and students coming from 22 countries across the globe are discussed. In the third part, research results are presented for different cultural clusters. The most important criteria for employer choice of respondents are reflected against the socio-economic background and against the characteristics of CSR of the countries in question. Finally, the results are summarized and implications for

global employer branding are derived.

Japanese Hiragana & Katakana for Beginners

Timothy G. Stout

2013-11-21 The method that's helped thousands in the U.S. and Japan learn Japanese successfully. The Japanese language has two basic writing systems, hiragana and katakana, in addition to the one that uses Chinese characters or Kanji. This handy book teaches you a new mnemonics-based method to read and write the basic 92 hiragana and katakana characters. Along with its sister book: Japanese Kanji for

Beginners it provides a complete introduction to written Japanese.

Memorable picture mnemonics help you to learn the characters by associating their shapes and sounds with combinations of images and English words already familiar to you. Clear examples and entertaining exercises offer opportunities to read, write, use and practice all 46 basic hiragana and 46 basic katakana characters, plus the remaining kana that stand for more complex sounds. Polish your knowledge with word searches, crossword puzzles, fill-in-the-blanks, timed recognition quizzes, and other interesting activities. The downloadable audio allows you to print out your own flash cards (featuring the same mnemonic images taught in the book) to help you

Innovative Solutions
Apala Lahiri Chavan
2010-08-16 Expanding into emerging markets brings with it a specific set of challenges for designing products and services. Not only do cultural differences play a role in what, how, and why customers behave the way they do, but existing technologies, distribution channels, and the wants and needs of consumers become additional challenges when establishing market shares in the developing world. *Innovative Solutions: What Designers Need to Know*

for Today's Emerging Markets describes the landscape of these new markets and discusses research and design methodologies tailored to them. Local designers and researchers offer insight directly from the depths of India, China, and other parts of the world. They take an in-depth look at user research methods in underserved communities, new tools such as ecosystems mapping to define the elements impacting innovation and design decisions, and methodologies to develop solution spaces based on the output from user research studies. The book then presents real-life examples through case studies and interviews. The case studies draw not only from the authors' work with clients such as HP Labs, Nokia, Haier, Philips, Intel, and A Piece of Pie, but also

from user experience and the results of innovation research across the globe. The interviews include conversations with leaders in innovation such as Roopa Purushothaman, Tapan Parikh, Ram Sehgal, Steve Portigal, Dmitry Volkov, and Darelle van Greunen. A fascinating perspective of the users and ecosystem in emerging nations, the

book provides deeper insights on how a user-centered innovation and design approach has been applied in practical settings. Examining the challenges of innovating and designing for emerging markets, it incorporates research and practice to explore new ways of uncovering the riches and opportunities in innovation and design for emerging markets.
