The Acquisition of the Present Dalila Ayoun 2015-10-15 This is the first edited volume that tackles the acquisition of the present (tense, aspect, temporality), an under-researched area, particularly compared to the acquisition of past temporality. The first two chapters focus on the L1 acquisition of English from the perspective of the Aspect hypothesis and the Verb-Island hypothesis (Wang & Shirai) and the L1 acquisition of French from the perspective of the zero-tense hypothesis (Demirdache & Lungu). The remaining chapters tackle the L2 acquisition of English (Liszka, Al-Thubaiti, Vraciu), French (Ayoun, Saillard), Spanish (Gabriele et al.), Russian (Martelle) and Japanese (Shirai & Li) by learners of different L1s (French, English, Arabic, Chinese and Korean), testing various semantic and syntactic hypotheses. The last chapter presents a summary of the findings, and offers a few conclusions as well as broad directions for future research.

International Acronyms, Initialisms & Abbreviations Dictionary Julie E. Towell 1987

Presidential Power Robert Y. Shapiro 2000-08-31 Richard Neustadt's seminal work Presidential Power: The Politics

of Leadership has endured for nearly four decades as the core of academic study of the American presidency. Now, building on and challenging many of the arguments in Neustadt's work, *Presidential Power: Forging the Presidency for the Twenty-first Century* offers reflections and implications from what we have learned about presidential power as the new century dawns. These essays—including a new contribution by Neustadt himself—forge a solid reexamination of Neustadt's *Presidential Power* that address questions raised but not resolved by his work. A notable aspect of this volume's analysis is the transformed institution of the presidency in the wake of the impeachment hearings of the country's last twentieth-century president, Bill Clinton. From the portrayal of presidents as persuaders to the politics of presidential transitions, each of the constituent essays in this volume provides an engaging look at the state of the American presidency.

North Korea Policy Linus Hagström
2007-01-24 North Korea features highly on the agenda of the main actors in East Asia and around the globe, and many large foreign policy initiatives have been undertaken since the structural constraints of the Cold War started to loosen in the early 1990s. The centrality of North Korea has been particularly emphasized by the country's suspected development of nuclear weapons which is regarded as one of the largest destabilising factors in the Asia-Pacific region. This comprehensive book analyzes the formation of the North Korea policy in the context of great power relations in East Asia, specifically focusing on Japan's policy formation and 'the Japan factor' in the North Korea policies of other concerned great powers, namely the US, China, Russia, South Korea and the EU. By adopting an empirical focus on the international interaction over North Korea, this book brings together issues that are highly relevant to contemporary Japanese foreign policy; clarifies what is happening in the region right now and plots what policy options are available for the future. Policy-oriented and based on careful empirical analysis, North Korea Policy will appeal to both policy makers and scholars of Asian foreign policy.

Russia in the Indo-Pacific Gaye Christoffersen 2021-11-23 This volume zones in on Russia's relations with the Indo-Pacific region through the lens of theoretical pluralism, presenting alternatives to the mainstream Realist view of Russia as a major power using geopolitical strategies to establish itself. Confronting the Bush Doctrine Melvin Gurtov 2004-10-28 There is no doubt that President George W. Bush and his administration have transformed US foreign policy and reshaped global international relations in a very profound way. Many American commentators continue to talk about 9/11 as the day the world changed, but increasingly analysts around the world are concluding that more important than 9/11 have been the ideas that the Bush leadership brought into office in January 2001. Confronting the Bush Doctrine is the first book to take on the vitally important task of analyzing how the Asia Pacific region sees and evaluates what the United States is doing. With contributions from an outstanding group of scholars, many of whom are based in the region, this book will prove to be an invaluable resource to all students and scholars of American and Asian politics.

Perilous Memories T. Fujitani 2001-05-31 Perilous Memories makes a

groundbreaking and critical intervention into debates about war memory in the Asia-Pacific region. Arguing that much is lost or erased when the Asia-Pacific War(s) are reduced to the 1941–1945 war between Japan and the United States, this collection challenges mainstream memories of the Second World War in favor of what were actually multiple, widespread conflicts. The contributors recuperate marginalized or silenced memories of wars throughout the region—not only in Japan and the United States but also in China, Southeast Asia, the Pacific Islands, Okinawa, Taiwan, and Korea. Firmly based on the insight that memory is always mediated and that the past is not a stable object, the volume demonstrates that we can intervene positively yet critically in the recovery and reinterpretation of events and experiences that have been pushed to the peripheries of the past. The contributors—an international list of anthropologists, cultural critics, historians, literary scholars, and activists—show how both dominant and subjugated memories have emerged out of entanglements with such forces as nationalism, imperialism, colonialism, racism, and sexism. They consider both how the past is remembered and also what the consequences may be of privileging one set of memories over others. Specific objects of study range from photographs, animation, songs, and films to military occupations and attacks, minorities in wartime, “comfort women,” commemorative events, and postwar activism in pursuing redress and reparations. *Perilous Memories* is a model for war memory intervention and will be of interest to historians and other scholars and activists engaged with collective memory, colonial studies, U.S. and Asian history, and cultural

studies. Contributors. Chen Yingzhen, Chungmoo Choi, Vicente M. Diaz, Arif Dirlik, T. Fujitani, Ishihara Masaie, Lamont Lindstrom, George Lipsitz, Marita Sturken, Toyonaga Keisaburo, Utsumi Aiko, Morio Watanabe, Geoffrey M. White, Diana Wong, Daqing Yang, Lisa Yoneyama

Russian Trade Policy Sergei Sutyrin 2019-05-28 This book reveals the key trends in the modern Russian trade policy to provide a deeper understanding of the main challenges and barriers, possible paths and opportunities in its development. An international team of authors investigates specific factors influencing the Russian trade policy evolution; recent trends in Russia's international trade development; and the impact of Russia's participation in the World Trade Organization on the domestic economy. Particular attention is paid to regional integration processes that involve Russia and their outcomes; as well as challenges in the remaining and building commercial relations with Russia's traditional and 'new' trade partners, taking into consideration those alienating the West and economic sanctions regimes. The analysis of key trends is combined with a special focus on selected industries and economic partners of

Russia. The book contains a variety of case studies investigating the ways in which political and business actors adapt to the transformation of Russian trade policy, how Russia participates in the WTO dispute settlement mechanism, and what the driving forces and outputs are for the national economic agents. Finally, the authors consider what the reasonable expectations might be

regarding the future prospects of Russian trade policy. The book presents a unique, comprehensive and multidimensional analysis of modern Russian trade policy. Filling an important gap in the existing literature, this book will be of value to all those interested in Russia's economic development path. *The Journal of the Korean Physical Society* 2008
